1 Introduction

1.1 This document

This document includes the ODF Athletics Data Dictionary. This Data Dictionary refines the messages described in the ODF General Messages Interface Document specifically for Athletics.

1.2 Objective

The objective of this document is to provide a complete and formal definition of the ODF Athletics Data Dictionary, with the intention that the information message producer and the message consumer can successfully interchange the information as the Athletics competition is run.

1.3 Main Audience

The main audience of this document is the IOC as the ODF promoter, ODF users such as the World News Press Agencies, Rights Holding Broadcasters and International Sports Federations.

1.4 2018 Commonwealth Games

This document is to be applied for the 2018 Commonwealth Games. All included concepts are applied with the following exceptions:

- DT_RESULT_ANALYSIS is not included
- QUAL_BEST is not available/used in any events.

1.1 2018 Youth Olympic Games

This document is to be applied for the 2018 Commonwealth Games. All included concepts are applied with the following exceptions:

- DT RESULT ANALYSIS is not included
- DT PARTIC
 - QUAL_BEST is not applicable
- DT PARTIC TEAMS is not included
- DT_CUMULATIVE_RESULT: Combined events do not apply. This message is only used for adding the final results in each medal event.

2.2 Messages

2.2.1 List of participants by discipline / List of participants by discipline update

2.2.1.1 Description

A participant is considered to be any individual (type athlete, participating or not in the current games) or any official in one or several disciplines or a competitor being part of a team (team member).

Although the participant may participate in more than one event or more than one discipline, this message just contains the information for the discipline of the message, listing the information of all the events for that discipline.

This message includes historical athletes that do not participate in the current competition. Historical athletes will not be registered to any event.

It is important to note that all the sport messages that make references to athletes (start list, event unit results, etc.) will always match the athlete ID with the athlete ID in this message. The historical athletes will be used to match historical athlete information as it appears in the records message when sending the previous record information and this previous record was an historical record not being broken in the current competition.

List of participants by discipline (DT_PARTIC) is a bulk message, provided for each discipline. It is a complete participant information message for one particular discipline. The arrival of this message resets all the previous participants' information for one particular discipline. This message can include a list of current athletes, officials, coaches, guides, technical officials, Reserves and historical athletes regardless of status.

List of participants by discipline update (DT_PARTIC_UPDATE) is an update message. It is not a complete list of participants' information by discipline message, only the participant data being modified, i.e. if some data of one participant changes, the element Participant for it with all its children and attributes must be sent.

The key of the information updated consists of the following attribute: Participant @Code. Therefore, any new or updated Participant Discipline-Event will be identified by all these attributes.

2.2.1.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment	
CompetitionCode	CC @Competition	Unique ID for competition	
DocumentCode	Full RSC (discipline level)	RSC at the discipline level	
DocumentType	DT_PARTIC / DT_PARTIC_UPDATE	List of participants by discipline message	
Version	1V	Version number associated to the message's content. Ascendant number	
FeedFlag	"P"-Production "T"-Test	Test message or production message.	
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.	
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.	
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.	
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).	
		The end of the logical day is defined by default at 03:00 a.m.	
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.	
		Logical Date is expressed in the local time zone where the message was produced.	
Source	SC @Source	Code indicating the system which generated the message.	

2.2.1.3 Trigger and Frequency

The DT_PARTIC message is sent as a bulk message before the Games. It is sent several times up to the date of transfer of control to OVR after which only DT_PARTIC_UPDATE messages are sent.

The DT_PARTIC_UPDATE message is triggered when there is a modification in the data for any individual after the transfer of control to OVR.

2.2.1.4 Message Values

2.2.1.4	a.z.1.4 Message values			
Element: Participa				
Attribute	M/O	Value	Description	
Code	M	S(20) with no leading zeroes	Participant's ID. It identifies an athlete or an official and the holding participant's valid information for one particular period of time.	
			It is used to link other messages to the participant's information.	
			Participant's information (example @Organisation) will not be the latest for the athlete/official, unless the @Code attribute is the same as the @Parent attribute. However, this information could be the one being valid in the particular moment of a start list, event unit results, etc.	
			When the participant is an historical one, then this ID will start with "A" when it is an Athlete, "C" when Coach and "O" when Official.	
Parent	M	S(20) with no leading zeroes	Participant's parent ID, which is used to link to the latest valid information for one participant. @Parent attribute should be linked to the latest participant's information, by retrieving that Athlete/Official whose @Code attribute is the same as @Parent.	
			The participant containing @Code attribute being the same as the @Parent attribute will be the one with the latest information for the participant. The @Parent attribute will only be different from @Code in the case that critial personal information has changed from previous competitions. The typical examples are Organisation (for change of country) or Name (particularly for women changing their name at marriage). Further to be clear, @Parent and @Code can only be different if Current = "false".	
Status	0	CC @ParticStatus	Participant's accreditation status this atribute is Mandatory in the case of @Current="true" and it is optional in the case that @Current="false". To delete a participant, a specific value of the Status attribute is used.	
GivenName	0	S(25)	Given name in WNPA format (mixed case)	
	M	S(25)	Family name in WNPA format (mixed case)	
PrintName	M	S(35)	Print name (family name in upper case + given name in mixed case)	
PrintInitialName	М	S(18)	Print Initial name (for the given name it is sent just the initial, without dot)	
TVName	М	S(35)	TV name	
-	*			

Element: Participant (1,N)				
Attribute	M/O	Value	Description	
TVInitialName	М	S(18)	TV initial name	
Gender	М	CC @PersonGender	Participant's gender	
Organisation	М	CC @Organisation	Organisation ID	
BirthDate	0	YYYY-MM-DD	Date of birth. This information may not be known at the very beginning, but it will be completed for all participants after successive updates	
Height	0	S(3)	Height in centimetres. It will be included if this information is available. This information is not needed in the case of officials/referees. "-" may be used where the data is not available.	
Weight	0	S(3)	Weight in kilograms. It will be included if this information is available. This information is not needed in the case of officials/referees. "-" may be used where the data is not available.	
PlaceofBirth	0	S(75)	Place of Birth	
CountryofBirth	0	CC @Country	Country ID of Birth	
PlaceofResidence	0	S(75)	Place of Residence	
CountryofResidence	0	CC @Country	Country ID of Residence	
Nationality	0	CC @Country	Participant's nationality. Although this attribute is optional, in very exceptional situations it will not be known, and for this reason not ready to be sent.	
MainFunctionId	0	CC @ResultsFunction	Main function In the Case of Current="true" this attribute is Mandatory.	
Current	М	boolean	It defines if a participant is participating in the games (true) or is a Historical participant (false).	
OlympicSolidarity	0	YorN	Flag to indicating if the participant participates in the Olympic Scholarship program.	

Element: Participant (1	Element: Participant (1,N)						
Attribute	M/O	Value	Description				
ModificationIndicator	М	S(1)	'N' or 'U' Attribute is mandatory in the DT_PARTIC_UPDATE message only				
			N-New participant (in the case that this information comes as a late entry) U-Update participant				
			If ModificationIndicator='N', then include new participant to the previous bulk-loaded list of participants				
			If ModificationIndicator='U', then update the participant to the previous bulk-loaded list of participants				
			To delete a participant, a specific value of the Status attribute is used.				

Element: Participant / Discipline (1,1)

All participating athletes will be assigned at least one discipline, it could be more. Each accredited official will be assigned at least one discipline, but it could be more. If an athlete or official is assigned to more than one discipline, it will be included in the participant message of both disciplines.

Attribute	M/O	Value	Description	
Code	М	CC @Discipline	It is the discipline code used to fill the OdfBody @DocumentCode attribute.	
IFId	0	S(16)	IF ID (competitor's federation number for the discipline). Note: Depending on the individual this can be IPC ID or IAAF ID.	

Element: Participant / Discipline / Registered Event (0, N)

All accredited athletes will be assigned to one or more events. There is an exception: substitutes may be accredited without any associated event. Historical athletes are not registered to any event.

2.2.1.5 Message Sort

The message is sorted by Participant @Code

2.2.2 List of teams / List of teams update

2.2.2.1 Description

DT_PARTIC_TEAMS contains the list of teams related to the current competition.

List of teams (DT_PARTIC_TEAMS) is a bulk message by discipline. The list is always complete. The arrival of this message resets all the previous participant teams' information for that discipline. It is assumed that all teams appearing in this list are valid, in the meaning that they are participating or they could participate in one event.

A historical team is defined as a group of athletes (team members) competing in the past in a competition event for an organisation. The historical team members appearing in this message will be listed in the list of historical athletes' messages. The list of historical teams just associates historical team members with the corresponding historical teams. Historical teams will not be registered to any event.

List of teams update (DT_PARTIC_TEAMS_UPDATE) is an update message. It is not a complete list of teams' information message. It only contains the data of a team being modified.

2.2.2.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment
CompetitionCode	CC @Competition	Unique ID for competition

2.2.2.5 Message Sort

The message is sorted by Team @Code.

2.2.3 Event Unit Start List and Results

2.2.3.1 Description

The Event Unit Start List and Results is a message containing both the start list and results information of the competitors in one (individual or team) event unit.

The Event Unit Start List and Results is a mandatory message for all sports. The definition includes as much generic information as possible due to the fact that each discipline and event has its own format for the results information (example: score of a match, time in a race, distance in a throw...).

This is always a full message and all applicable elements and attributes are always sent.

2.2.3.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment	
CompetitionCode	CC @Competition	Unique ID for competition	
DocumentCode	Full RSC	The DocumentCode will be sent according to the ODF Common Codes (header values)

Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.	
Time	Time	Time up to milliseconds when the message is generate expressed in the local time zone where the message w produced.	

Attribute	Value	Comment
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).
		The end of the logical day is defined by default at 03:00 a.m.
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.
		Logical Date is expressed in the local time zone where the message was produced.
Source	SC @Source	Code indicating the system which generated the message.

2.2.3.3 Trigger and Frequency

This message is sent with ResultStatus 'START_LIST' as soon as the expected information is available and any changes to the information:

- As soon as the start list is known and with any changes / IRMs before the start. (START_LIST)
- This message is then sent with ResultStatus 'LIVE' as soon as the unit starts and continues to be triggered on all updates.
- As soon as the competition starts (LIVE)
- After any addition / change in any data (LIVE)

This message is also sent when the event unit finishes and the results are still unofficial. Also, this message is expected when the results become official. The official/unofficial status is included in the ODF headers (ResultStatus attribute). The message is sent as 'INTERMEDIATE' during extended breaks:

- After the completion of every round / height in field events (INTERMEDIATE)
- After all competitors have finished the unit (UNOFFICIAL / OFFICIAL)

For each Event Unit Results message, there must be at least one competitor with a result element in the event unit.

Attribute	M/O	Value	Description
Rank	0	Text	Rank of the competitor in the corresponding event unit.
RankEqual	О	S(1)	Identifies if a rank has been equaled (Y). Only send if applicable
Result	0	hh:mm:ss.ff or hh:mm:ss or Numeric #0.00 (metres)	The result of the competitor in the event unit. Send just in the case @ResultType is Time, Distance or Points For distance: in metres
Unchecked	0	S(1)	Send "Y" if time is a transponder time or similar and needs to be validated by reading photo. Do not send unless applicable.
IRM	0	SC @IRM	IRM for the particular unit. Send just in the case @ResultType is IRM.
QualificationMark	0	SC @QualificationMark	Indicates the qualification of the competitor for the next round of the competition
SortOrder	M	Numeric	Used to sort all the results of the unit Before the start of any event unit this will be the same as the StartSortOrder and is used as the primary sort except in the case where a Rank is available (from earlier event units) and in this case the SortOrder will consider Rank in the same way as if the competition had already started. During the event unit any sort order change from the initial start list order for any competitor will be provided in this attribute regardless the competitor is ranked or not.
StartOrder	0	Numeric	Lane or Competitor's start order.
StartSortOrder	М	Numeric	Used to sort all start list competitors in an event unit, according to the sport rules.
ResultType	0	SC @ResultType	Type of the @Result attribute. Result type, either time, distance, points or IRM for the corresponding event unit.
Diff	0	h:mm:ss	Display the time / value behind the leader. All fill when applicable, 0.0 for leader, negative for in front of leader, positive for behind. For example +3.45 means 3.45 sec behind the leader, -1.23 means -1.23 sec infront of (better than) the leader. Only for Road event units (time): Marathon, 20km Race Walk and 50km Race Walk. 2.2.3.5 Message Sort

Sort by Result @SortOrder

2.2.4 Results Analysis

2.2.4.1 Description

The Results Analysis is a message containing additional information for the start list and/or results. In the case of athletics it provides the splits at a higher frequency.

This message is only used in track events over 400 metres and where transponders are carried by all athletes.

2.2.4.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment	
CompetitionCode	CC @Competition	Unique ID for competition	
DocumentCode Full RSC		Full RSC of the unit	
DocumentType	DT_RESULT_ANALYSIS	Event Unit Result Analysis message	
Version	1V	Version number associated to the message's content. Ascendant number	
ResultStatus	SC @ResultStatus	Use the same status as DT_RESULT	
FeedFlag	"P"-Production "T"-Test	Test message or production message.	
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.	
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.	
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.	
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).	
		The end of the logical day is defined by default at 03:00 a.m.	
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.	
		Logical Date is expressed in the local time zone where the message was produced.	
Source	SC @Source	Code indicating the system which generated the message.	

2.2.4.3 Trigger and Frequency

This message is then sent with ResultStatus 'LIVE' as soon as the unit starts and continues to be triggered on all updates.

• After any addition / change in any data (LIVE)

This message is also sent when the event unit finishes and the results are still unofficial. Also, this message is expected when the results become official. The official/unofficial status is included in the ODF headers.

• After the unit is complete (UNOFFICIAL / OFFICIAL)

2.2.6 Cumulative Results

2.2.6.1 Description

The Cumulative Results is a message containing the cumulative results for the competitors in a group of units.

In athletics, the Cumulative Results message is used only in combined events to send a summary of results (including rank) during the combined event or in YOG is used for combining the event performances.

2.2.6.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment	
CompetitionCode	CC @Competition	Unique ID for competition	
DocumentCode	Full RSC	Full RSC of the event	
DocumentType	DT_CUMULATIVE_RESULT	Cumulative Results message	
DocumentSubtype	Not used	Not used

		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.	
		Logical Date is expressed in the local time zone where the message was produced.	

Attribute	Value	Comment
Source	SC @Source	Code indicating the system which generated the message.

2.2.6.3 Trigger and Frequency

The cumulative results accumulate results over a number of units so are generally sent after each DT_RESULT message if the cumulative message applies (using same ResultStatus at DT_RESULT). When there is no unit in progress the cumulative results will have INTERMEDIATE status.

The first version should be triggered at the same time as the start list of the first unit is triggered and then after each unit in track events is completed. If field events it is triggered after each attempt as LIVE.

2.2.7.5 Message Sort

Sort by Competition /Image /Pos and SortOrder within image.

2.2.8 Records

2.2.8.1 Description

The message contains the list of all records from the start of the Games (events depending on header).

Special Situations - Not Established Records:

There are some situations where there are no records for a particular event. This can happen, for example, when the sport rules change (different weights or distances) or new events are introduced.

If this occurs then the NotEstablished flag is used to indicate this situation.

If a record is established for this event in the current competition then the NotEstablished flag and description will not be sent when a new record is established.

2.2.8.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment
CompetitionCode	CC @Competition	Unique ID for competition
DocumentCode	Full RSC (Discipline Level)	RSC of the discipline
DocumentSubcode	CC @RecordCode	If the message is sent as a result of a record being modified (broken, equalled or re-instated) then this attribute will be included and is the Record Event for the modification.
DocumentType	DT_RECORD	Records message
DocumentSubtype	FULL, PARTIAL	Send "FULL" if all records included. Send "PARTIAL" if only one record code is included.
Version	1V	Version number associated to the message's content. Ascendant number
FeedFlag	"P"-Production "T"-Test	Test message or production message.
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).

		Logical Date is expressed in the local time zone where the message was produced.
Source	SC @Source	Code indicating the system which generated the message.

2.2.8.3 Trigger and Frequency

The DT_RECORD (without DocumentSubcode) message is sent as a full message (all records in a discipline) prior to the competition. Any new version of the DT_RECORD message should replace all previous record information, either for the RecordCode specified in DocumentSubcode or all if no DocumentSubcode is specified.
