The IOC further disclaims any liability regarding the existence or inexistence of any intellectual property or other rights that might be claimed by third parties with respect to the implementation or use of the technology or information described in the Document.
 - The same conditions as those described in this Section shall apply mutatis mutandis to the license granted to the IOC on the Derivative Works in Section 2 above.
- 5. This License is perpetual subject to your conformance to its terms and conditions. The IOC may terminate this License immediately upon your breach of any of its terms and, upon such termination you will cease all use, duplication, distribution, and/or exploitation in any manner of the Document.
- 6. This License is governed by the laws of Switzerland. You agree that any disputes arising from or relating to this License will be resolved in the courts of Lausanne, Switzerland.

IF YOU DO NOT AGREE TO THESE TERMS YOU MUST CEASE ALL USE OF THE DOCUMENT NOW.

1 Introduction

1.1 This document

This document includes the ODF Taekwondo Data Dictionary. This Data Dictionary refines the messages described in the ODF General Messages Interface Document specifically for taekwondo.

1.2 Objective

The objective of this document is to provide a complete and formal definition of the ODF Taekwondo Data Dictionary, with the intention that the information message producer and the message consumer can successfully interchange the information as the taekwondo competition is run.

1.3 Main Audience

The main audience of this document is the IOC as the ODF promoter, ODF users such as the World News Press Agencies, Rights Holding Broadcasters and International Sports Federations.

1.4 Glossary

The following abbreviations are used in this document.

Acronym	Description		
IF	International Federation		
IOC	International Olympic Committee		
NOC	National Olympic Committee		
ODF	Olympic Data Feed		
RSC	Results System Codes		
WNPA	World News Press Agencies		

1.5 Related Documents

Document Title	Document Description
ODF General Principles Document	The document explains the environment and general principles for ODF.
ODF General Messages Interface Document	The document describes the ODF General Messages
ODF Common Codes	The document describes the ODF Common codes used across all ODF documents.
ODF Sport Codes	The document describes the ODF Sport codes used across all ODF documents
ODF Header Values	The document details the header values which show which RSCs are used in which messages.

2 Messages

2.1 Applicable Messages

The following table is a full list of all ODF messages and describes the list of messages used in taekwondo.

- The column "Message type" indicates the DocumentType that identifies a message
- The column "Message name" is the message name identified by the message type
- The column "Message extended" indicates whether a particular message has extended definition in regards to those that are general for all sports. If one particular message is not extended, then it should follow the general definition rules.

Message Type	Message Name	Message extended
DT_SCHEDULE / DT_SCHEDULE_UPDATE	Competition schedule / Competition schedule update	Х
DT_PARTIC / DT_PARTIC_UPDATE	List of participants by discipline / List of participants by discipline update	Х
DT_PARTIC_NAME	Participant Names	
DT_MEDALS	Medal standings	
DT_MEDALLISTS_DAY	Medallists of the day	
DT_GLOBAL_GM	Global good morning	
DT_GLOBAL_GN	Global good night	
DT_RESULT	Event Unit Start List and Results	Х
DT_PLAY_BY_PLAY	Play by Play	Х
DT_BRACKETS	Brackets	X
DT_STATS	Statistics	X
DT_RANKING	Event Final Ranking	X
DT_COMMUNICATION	Official Communication	
DT_CONFIG	Configuration	X
DT_MEDALLISTS	Event's Medallists	
DT_MEDALLISTS_DISCIPLINE	Medallists by discipline	
DT_LOCAL_OFF	Discipline/venue stop transmission	
DT_LOCAL_ON	Discipline/venue start transmission	
DT_KA	Keep Alive	

2.2 Messages

2.2.1 Competition schedule / Competition schedule update

2.2.1.1 Description

The Competition schedule is a bulk message provided for one particular discipline. As a general rule, it contains the complete schedule information for all event units needed to run a competition and excludes event units for activities such as unofficial training and press conferences.

This message contains the competition timetable for a complete discipline as well as status for each competition unit and is updated from OVR via the schedule update message.

All event units in codes which have the 'schedule' flag set to 'Y' are included in schedule messages (and have status UNSCHEDULED or SCHEDULED).

The arrival of the competition schedule message resets all the previous schedule information for one particular discipline.

The StartList component of the message is only included in the case that the Unit Type is one of HATH, HCOUP, HNOC or HTEAM and at least one of the competitors are known.

The Composition component (i.e. listing athletes) is only included in the case that the Unit Type is one of HATH or HCOUP.

For reference the applicable unit types (from common codes) are:

HATH Individual Head to Head units (e.g. ARC, BDM, TEN etc) HCOUP Pairs/Couples Head to Head units (e.g. BDM, TEN etc) HNOC NOC Head to Head units (e.g. ARC) HTEAM Teams Head to Head units (e.g. BKB, VBV, HOC etc)

Managing when start times are not known.

In some disciplines the start time of each unit is not known and the units are managed by order rather than time.

In these disciplines usually only the time of the first unit (or first unit per location) is known and distributed. In this case all units should be sent with the same start time and those following units flagged as HideStartDate (and finish). To be able to correctly order these units then the Order attribute is used.

To ensure there are no incorrectly ordered units then the start time must not be updated to the actual start time (there is an actual start time field to cater for this).

If the discipline requires some text describing the order then StartText is used. Typical uses include 'Not before 17:00' or 'SUN 29 - 2nd match on CC' or 'Follows'.

Where HideStartDate='Y' is used then all start times for the units may be the same, usually the same as the first unit in the session or location (which generally will not use HideStartDate='Y') but this is not mandatory and approximate start times may be used. The specific way this is managed in each sport is detailed in the specific sport data dictionary.

Advice for end users - how to sort event units and use DT SCHEDULE:

- When displaying the schedule users must use the following sort order to display as intended:
- 1. By day (or filter by day)
- 2. By location if applicable (in a small number of sports)
- 3. By Time (regardless if HideStartDate='Y')
- 4. By Order
- The Order is sent for all units where HideStartDate='Y' else only sent if a particular event order is expected. Start with 1 each new session each day
- End users should display StartText if HideStartDate='Y'

Competition schedule update:

Competition schedule update is an update message. It is not a complete schedule information message, but only the schedule data being modified.

The arrival of this message updates the previous schedule information for one particular event unit, but does not notify any other change for the rest of the event units except for those contained in the message.

The key of the information updated is Unit @Code. Therefore, any new unit, deleted unit or updated unit will be identified by this attribute.

It has to be understood that if one DT_SCHEDULE message arrives, then all previous DT_SCHEDULE_UPDATE messages should be discarded.

2.2.1.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment
CompetitionCode	CC @Competition	Unique ID for competition
DocumentCode	Full RSC at discipline level	
DocumentType	DT_SCHEDULE / DT_SCHEDULE_UPDATE	Competition schedule bulk / update
Version	1V	Version number associated to the message's content. Ascendant number
FeedFlag	"P"-Production "T"-Test	Test message or production message.
Date	Date	Refer to the ODF header definition
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.

Attribute	Value	Comment
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).
		The end of the logical day is defined by default at 03:00 a.m.
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.
		Logical Date is expressed in the local time zone where the message was produced.
Source	SC @Source	Code indicating the system which generated the message.

2.2.1.3 Trigger and Frequency

The competition schedule will be sent as a bulk message (DocumentType='DT_SCHEDULE') before the Games and then sent multiple times until a date to be confirmed after which only update messages will be sent (DocumentType='DT_SCHEDULE_UPDATE') by OVR. There is no automatic triggering and this (DT_SCHEDULE) message must not be sent after the transfer of control to OVR.

The competition schedule update message should be triggered at any time there has been a competition schedule modification for any previously sent competition schedule bulk message or update message including the addition of start list details (H2H).

Generally start list details for H2H should be sent immediately when known and usually soon after the preceding unit changes to Official.

If any text descriptions change in a message (as opposed to the code) then this message is not resent to correct previous messages however the new data is to be used in future messages.

2.2.1.4 Message Values

Element: Competition /Session (0,N)				
Attribute	M/O	Value	Description	
SessionCode	М	S(5)	Format DDD00 where DDD is the discipline and 00 is the session number.	
StartDate	М	DateTime	Start date. Example: 2006-02-26T10:00:00+01:00	
EndDate	0	DateTime	End date. Example: 2006-02-26T10:00:00+01:00	
Leadin	0	m:ss	Amount of time from session start to first scheduled unit.	
Venue	М	CC @VenueCode	Venue where the session takes place	
VenueName	М	S(25)	Venue name	
ModificationIndicator	0	S(1)	Attribute is mandatory in the DT_SCHEDULE_UPDATE message. N = New or U = Update.	
SessionStatus	М	CC @ScheduleStatus	Only use CANCELLED if applicable. All other sessions are assumed to be scheduled. There is no change to running or finished.	
SessionType	0	CC @SessionType	Session Type of the session	

Element: Competition / Session / Session Name (1,N)				
Attribute	M/O	Value	Description	
Language	М	CC @Language	Language of the Session Description	
Value	0	S(40)	Name of the session. (if no other name then is session code)	

Element: Competition	/Unit (0,N)		
Attribute	M/O	Value	Description
Code	М	Full RSC for the unit	
PhaseType	М	CC @PhaseType	Phase type for the unit
UnitNum	0	S(6)	Match / Game / Bout / Race Number or similar
ScheduleStatus	М	CC @ScheduleStatus	Unit Status
StartDate	0	DateTime	Start date. This attribute may not be sent when the @ScheduleStatus is UNSCHEDULED. For other statuses the StartDate is expected otherwise ordering is display is incorrect (including CANCELLED and POSTPONED.) This is the scheduled Start date and time and will not be updated when an event unit starts (updated only with RESCHEDULED status) Where HideStartDate='Y' then this should be filled with the session start time or the start time of a group of units for all similar units and Order used for sorting. Example: 2006-02-26T10:00:00+01:00
HideStartDate	0	S(1)	Send 'Y' if StartDate (scheduled start time) should not be displayed. It may be an estimate or 'fake' time. Do not send if StartDate (scheduled start time) is to be displayed. Start times of some units depend on the finalisation of previous event units and therefore there is no fixed start time in these cases this field is set to 'Y'. When the flag is set to 'Y' then the time is used for sorting purposes but should not be displayed.
EndDate	0	DateTime	End date. This attribute may not be sent when the @ScheduleStatus is UNSCHEDULED, POSTPONED or CANCELLED. Example: 2006-02-26T10:00:00+01:00
HideEndDate	0	S(1)	Send 'Y' if EndDate scheduled end time is not to be displayed. Some event units have a scheduled end time well bounded, however, some event units in some circumstances have a scheduled end time not quite variable (example, some press conferences or tennis matches, etc.) in these cases this field is set to 'Y' and should not be displayed.

Element: Competition	/Unit (0,N)		
Attribute	M/O	Value	Description
ActualStartDate	0	DateTime	This attribute is expected once the event unit has started. Example: 2006-02-26T10:03:22+01:00
ActualEndDate	0	DateTime	This attribute is expected once the event unit has finished. Example: 2006-02-26T12:43:51+01:00
Order	0	Numeric ###0	 Order of the units when displayed. This field is considered in two situations: 1. If HideStartDate = 'Y' then send at least for all Units in an affected session though it is suggested to be sent for all units in a discipline where the concept is used in the discipline. 2. If some units start at the same time and a particular order of the units is expected. It is generally recommended to start at 1 in e ach session each day though may be ordered independently by location starting at 1 for each location in each session (where the schedule is ordered by location) or using other numbers to ensure the order of two using starting at the same time are displayed in the appropriate order.
Medal	0	SC @UnitMedalType	Gold medal event unit or bronze medal event unit. Do not send if not a medal event unit
Venue	М	CC @VenueCode	VVenue where the unit takes place Use TBD if the Venue is not known yet (CC).
Location	M	CC @Location	Location where the unit takes place Use TBD if the Location is not known yet (CC) or a generic code for the discipline.
SessionCode	0	S(5)	Code of the session which contains this event unit. Usually in the format DDD00 where DDD is the discipline and 00 is the session number within the discipline. For example ATH02 for the second session in Athletics.
ModificationIndicator	0	N, U	Attribute is mandatory in the DT_SCHEDULE_UPDATE message only N-New event unit U-Update event unit If ModificationIndicator='N', then include new event unit. It will be rarely used as most added units were available in "UNSCHEDULED" status. If ModificationIndicator="U", then update the event unit.

Element: Competition / Unit / StartText (0,N)

This element is only used for Competition Schedules when HideStartDate is 'Y'. In this case, English Language is mandatory.

Attribute	M/O	Value	Description
Language	М	CC @Language	Code Language of the @Value
Value	М	S(20)	Text to be displayed in the case that StartDate is not to be displayed (e.g. "After M.1" or "Followed by") Using a code set or fixed text will also be directly displayed and allow end user translation.

Element: Competiti	Element: Competition /Unit /ItemName (1,N)				
Attribute	M/O	Value	Description		
Language	M	CC @Language	Code Language of the @Value		
Value	М	S(40)	Item Name / Unit Description.		
			For competition units show the short unit description from common codes which matches the RSC.		

Element: Competition /Unit /VenueDescription (1,1)				
Attribute	M/O	Value	Description	
VenueName	М	S(25)	Venue name in first language. This is the CC value from unit/venue	
LocationName	М	S(30)	Location name in first language. This is the CC value from unit/location.	

Element: Competition	on /Unit /Sta	rtList /Start (1,N)	
Attribute	M/O	Value	Description
StartOrder	0	Numeric	Competitor's start order
SortOrder	М	Numeric	Used to sort competitors in an event unit (for example, if there is no StartOrder). It is mainly used for display purposes.

Element: Competition /Unit /StartList /Start /Competitor (1,1)					
Attribute M/O Value		Value	Description		
Code	M	S(20) with no leading zeroes, TBD or NOCOMP.	Competitor's ID, TBD in case that the competitor is not known at this time AND the other competitor is known. NOCOMP is sent when there is no competitor (and will not come later)		
Туре	М	T,A	T for team A for athlete		
Organisation	О	CC @Organisation	Should be sent when known		

Element: Competition / Unit / Start List / Start / Competitor / Composition / Athlete (1,N)				
In case of the Comp	etitor @Code=	:'TBD' this element shou	ald not be sent.	
Attribute	M/O	O Value Description		
Code	М	S(20) with no leading zeroes	Athlete's ID, corresponding to either a team member or an individual athlete in the event unit.	
Order	М	Numeric	Order attribute used to sort team members in a team (if Competitor @Type="T") or 1 if Competitor @Type="A".	

Element: Competition /Unit /StartList /Start /Competitor /Composition /Athlete /Description (1,1)				
Attribute	M/O	Value	Description	
GivenName	0	S(25)	Given name in WNPA format (mixed case). Send if not null.	
FamilyName	М	S(25)	Family name in WNPA format (mixed case)	
Gender	М	CC @PersonGender	Participant's gender	
Organisation	М	CC @Organisation	Organisation ID	
BirthDate	0	YYYY-MM-DD	Date of birth.	
IFId	0	S(16)	Athlete IF number, send if available, only for the current discipline.	
Class	0	CC @SportClass	Code to identify the sport class in the case of events with athletes with a disability (e.g: Paralympic Games).	

2.2.1.5 Message Sort

The message is sorted by Unit@StartDate then by Unit@Order then Unit@Code.

In case of event unit with no Unit@StartDate defined (example, they are in an event unit status such as UNSCHEDULED), they will be listed at the end in Unit@Code order.

2.2.2 List of participants by discipline / List of participants by discipline update

2.2.2.1 Description

A participant is considered to be any individual (type athlete, participating or not in the current games) or any official in one or several disciplines or a competitor being part of a team (team member).

Although the participant may participate in more than one event or more than one discipline, this message just contains the information for the discipline of the message, listing the information of all the events for that discipline.

This message includes historical athletes that do not participate in the current competition. Historical athletes will not be registered to any event.

It is important to note that all the sport messages that make references to athletes (start list, event unit results, etc.) will always match the athlete ID with the athlete ID in this message. The historical athletes will be used to match historical athlete information as it appears in the records message when sending the previous record information and this previous record was an historical record not being broken in the current competition.

List of participants by discipline (DT_PARTIC) is a bulk message, provided for each discipline. It is a complete participant information message for one particular discipline. The arrival of this message resets all the previous participants' information for one particular discipline. This message can include a list of current athletes, officials, coaches, guides, technical officials, Reserves and historical athletes regardless of status.

List of participants by discipline update (DT_PARTIC_UPDATE) is an update message. It is not a complete list of participants' information by discipline message, only the participant data being modified, i.e. if some data of one participant changes, the element Participant for it with all its children and attributes must be sent.

The key of the information updated consists of the following attribute: Participant @Code. Therefore, any new or updated Participant Discipline-Event will be identified by all these attributes.

2.2.2.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment
CompetitionCode	CC @Competition	Unique ID for competition
DocumentCode	Full RSC. Discipline level	RSC at discipline level
DocumentType	DT_PARTIC / DT_PARTIC_UPDATE	List of participants by discipline message
Version	1V	Version number associated to the message's content. Ascendant number
FeedFlag	"P"-Production "T"-Test	Test message or production message.

Attribute	Value	Comment
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).
		The end of the logical day is defined by default at 03:00 a.m.
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.
		Logical Date is expressed in the local time zone where the message was produced.
Source	SC @Source	Code indicating the system which generated the message.

2.2.2.3 Trigger and Frequency

The DT_PARTIC message is sent as a bulk message before the Games. It is sent several times up to the date of transfer of control to OVR after which only DT_PARTIC_UPDATE messages are sent.

The DT_PARTIC_UPDATE message is triggered when there is a modification in the data for any individual after the transfer of control to OVR.

2.2.2.4 Message Values

Element: Participant (1,N)				
Attribute	м/о	Value	Description	
Code	М	S(20) with no leading zeroes	Participant's ID.	
			It identifies an athlete or an official and the holding participant's valid information for one particular period of time.	
			It is used to link other messages to the participant's information.	
			Participant's information (example @Organisation) will not be the latest for the athlete/official, unless the @Code attribute is the same as the @Parent attribute. However, this information could be the one being valid in the particular moment of a start list, event unit results, etc.	
			When the participant is an historical one, then this ID will start with "A" when it is an Athlete, "C" when Coach and "O" when Official.	
Parent	M	S(20) with no leading zeroes	Participant's parent ID, which is used to link to the latest valid information for one participant. @Parent attribute should be linked to the latest participant's information, by retrieving that Athlete/Official whose @Code attribute is the same as @Parent.	
			The participant containing @Code attribute being the same as the @Parent attribute will be the one with the latest information for the participant. The @Parent attribute will only be different from @Code in the case that critial personal information has changed from previous competitions. The typical examples are Organisation (for change of country) or Name (particularly for women changing their name at marriage). Further to be clear, @Parent and @Code can only be different if Current = "false".	
Status	0	CC @ParticStatus	Participant's accreditation status this atribute is Mandatory in the case of @Current="true" and it is optional in the case that @Current="false". To delete a participant, a specific value of the Status attribute	
			is used.	
GivenName	0	S(25)	Given name in WNPA format (mixed case)	
FamilyName	М	S(25)	Family name in WNPA format (mixed case)	
PassportGivenName	0	S(25)	Passport Given Name (Uppercase)	
PassportFamilyName	0	S(25)	Passport Family Name (Uppercase)	

Element: Participant (Attribute	(1,N) M/O	Value	Description
			Description
PrintName	M	S(35)	Print name (family name in upper case + given name in mixed case)
PrintInitialName	M	S(18)	Print Initial name (for the given name it is sent just the initial, without dot)
TVName	М	S(35)	TV name
TVInitialName	М	S(18)	TV initial name
TVFamilyName	М	S(25)	TV family name
LocalFamilyName	0	S(25)	Family name in the local language in the appropriate case for the local language (usually mixed case) Not for use in Rio 2016
LocalGivenName	0	S(25)	Given name in the local language in the appropriate case for the local language (usually mixed case). Not for use in Rio 2016
Gender	М	CC @PersonGender	Participant's gender
Organisation	М	CC @Organisation	Organisation ID
BirthDate	0	YYYY-MM-DD	Date of birth. This information may not be known at the very beginning, but it will be completed for all participants after successive updates
Height	0	S(3)	Height in centimetres. It will be included if this information is available. This information is not needed in the case of officials/referees. "-" may be used where the data is not available.
Weight	0	S(3)	Weight in kilograms. It will be included if this information is available. This information is not needed in the case of officials/referees. "-" may be used where the data is not available.
PlaceofBirth	О	S(75)	Place of Birth
CountryofBirth	0	CC @Country	Country ID of Birth
PlaceofResidence	0	S(75)	Place of Residence
CountryofResidence	0	CC @Country	Country ID of Residence
Nationality	0	CC @Country	Participant's nationality.
			Although this attribute is optional, in very exceptional situations it will not be known, and for this reason not ready to be sent.
MainFunctionId	0	CC @ResultsFunction	Main function
		whesuits Full ction	In the Case of Current="true" this attribute is Mandatory.

Element: Participant (Element: Participant (1,N)				
Attribute	M/O	Value	Description		
Current	M	boolean	It defines if a participant is participating in the games (true) or is a Historical participant (false).		
OlympicSolidarity	0	S(1)	'Y' or 'N' Flag to indicating if the participant participates in the Olympic Scholarship program.		
ModificationIndicator	М	S(1)	'N' or 'U' Attribute is mandatory in the DT_PARTIC_UPDATE message only		
			N-New participant (in the case that this information comes as a late entry) U-Update participant		
			If ModificationIndicator='N', then include new participant to the previous bulk-loaded list of participants		
			If ModificationIndicator='U', then update the participant to the previous bulk-loaded list of participants		
			To delete a participant, a specific value of the Status attribute is used.		

Element: Participant / Discipline (1,1)

All participating athletes will be assigned at least one discipline, it could be more. Each accredited official will be assigned at least one discipline, but it could be more. If an athlete or official is assigned to more than one discipline, it will be included in the participant message of both disciplines.

Attribute	M/O	Value	Description
Code	М	CC @Discipline	It is the discipline code used to fill the OdfBody @DocumentCode attribute.
IFId	0	S(16)	WT License number (competitor's federation license number for the discipline).

Element: Participant / Discipline / Registered Event (0,N)

All accredited athletes will be assigned to one or more events. There is one exception: in some sports, substitutes may be accredited without any associated event. Historical athletes are not registered to any event.

Attribute	M/O	Value	Description
Event	М	CC @Event	Full RSC of the event
Class	0	- •	Code to identify the sport class in the case of events with athletes with a disability (e.g. Paralympic Games).

Elem	Element: Participant /Discipline /RegisteredEvent /EventEntry (0,N)					
Send	Send if there are specific athlete's event entries.					
	Туре	Code	Pos	Description		
ENTR	Y	QUAL_TYPE	N/A	Element Expected: As soon as this information is known (this information can be sent in both messages)		
	Attribute	M/O	Value	Description		
	Value	М	SC @QualifiyingType	Type of qualification		
ENTR	Υ	QUAL_REGION	N/A	Element Expected: As soon as it is known (it can be sent in both messages)		
	Attribute	M/O	Value	Description		
	Value	М	CC @Region	The region where the competitor was qualified. Continental Qualifier.		
ENTR	Y	RANK_OG	N/A	Description of @Pos: N/A Element's Expected: As soon as it is known (it can be sent in both messages)		
	Attribute	M/O	Value	Description		
	Value	М	Numeric ##0	Olympic Ranking		
ENTR	Y	SEED	N/A	Element Expected: As soon as it is known (this information can be sent in both messages).		
	Attribute	M/O	Value	Description		
	Value	М	S(6)	The position in which the athlete is seeded for the competition or NS if not seeded.		

2.2.2.5 Message Sort

The message is sorted by Participant @Code

2.2.3 Event Unit Start List and Results

2.2.3.1 Description

The Event Unit Start List and Results is a message containing both the start list and results information of the competitors in one (individual or team) event unit.

The Event Unit Start List and Results is a mandatory message for all sports. The definition includes as much generic information as possible due to the fact that each discipline and event has its own format for the results information (example: score of a match, time in a race, distance in a throw...).

This is always a full message and all applicable elements and attributes are always sent.

2.2.3.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment
CompetitionCode	CC @Competition	Unique ID for competition
DocumentCode	Full RSC	
DocumentType	DT_RESULT	Event Unit Start List and Results message
DocumentSubtype	Not used	Not used
Version	1V	Version number associated to the message's content. Ascendant number
ResultStatus	SC @ResultStatus	It indicates whether the result is official or unofficial (or intermediate etc). START_LIST OFFICIAL LIVE (used during the competition when nothing else applies). UNCONFIRMED (used after the competition is completed and before either UNOFFICIAL or OFFICIAL. It may be sent multiple times if modifications are required and the status has not changed)
FeedFlag	"P"-Production "T"-Test	Test message or production message.
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on

Attribute	Value	Comment
		which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).
		The end of the logical day is defined by default at 03:00 a.m.
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.
		Logical Date is expressed in the local time zone where the message was produced.
Source	SC @Source	Code indicating the system which generated the message.

2.2.3.3 Trigger and Frequency

- As soon as each competitor is known and any changes in start list data (START_LIST)
- When the unit starts and after every change in any data (LIVE)
- When each round finishes (INTERMEDIATE)
- After the unit is over (UNOFFICIAL/OFFICIAL)

Trigger also after any change.

2.2.3.4 Message Values

Element: ExtendedInfos /UnitDateTime (0,1)				
Attribute	M/O	Value	Description	
StartDate	M	DateTime	Actual start date-time. Do not include until unit starts.	

Elem	Element: ExtendedInfos /ExtendedInfo (0,N)

</Official>
```

Element: Periods (0,1)						
Attribute	M/O	Value	Description			
Home	М	S(20) with no leading zeroes	Competitor code of the home competitor (Blue). Must send if known			
Away	М	S(20) with no leading zeroes	Competitor code of the away competitor (Red). Must send if known			

Element: Periods /Period (1,N)				
Attribute	M/O	Value	Description	
Code	М	SC @Period	Round Number	
HomeScore	M	Numeric #0	Overall score of the blue competitor at the end of the round. In case Decision=(BYE or BBY), HomeScore=0	
AwayScore	M	Numeric #0	Overall score of the red competitor at the end of the round In case Decision=(BYE or BBY), AwayScore=0	
HomePeriodScore	0	Numeric #0	Score of the blue competitor just for that round.	
AwayPeriodScore	0	Numeric #0	Score of the red competitor just for that round.	

Element: Result (1,N)	Element: Result (1,N)				
Attribute	M/O	Value	Description		
Result	0	String	Result of the competitor for the particular event unit. Ex. "-1", "2", "0" To be sent as soon as available during the contest.		
IRM	0	SC @IRM	IRM of the competitor for the particular event unit. Send just in the case @ResultType both Points and IRM.		
WLT	0	SC @WLT	The code whether a competitor won or lost the contest.		
SortOrder	М	Numeric	This attribute is a sequential number with the order of the competitor. Send 1 for Blue competitor and 2 for Red competitor.		
StartSortOrder	М	Numeric	Send 1 for Blue competitor and 2 for Red competitor.		
ResultType	0	SC @ResultType	Result type, either points or IRM with points for the corresponding event unit.		

Elem	Element: Result /ExtendedResults /ExtendedResult (1,N)				
	Туре	Code	Pos	Description	
EARN	J	ATTK	N/A	Element Expected: When available	
	Attribute	M/O	Value	Description	
	Value	0	Numeric #0	The total points earned by attack	
EARN	J	PTY	N/A	Element Expected: When available	
	Attribute	M/O	Value	Description	
	Value	О	Numeric #0	The total points earned by penalty	
SCOF	RE	SC@Technique	SC @Period	Pos Description: Send the period code	
				Element Expected: When available	
	Attribute	M/O	Value	Description	
	Value	0	Numeric #0	The total number of this technique in this period (including penalties).	
IVR		BEFORE	N/A	Element Expected: Always	
	Attribute	M/O	Value	Description	
	Value	М	Numeric #0	Send the IVR available at the start of the contest	
IVR		REMAIN	N/A	Element Expected: Always	
	Attribute	M/O	Value	Description	
	Value	М	Numeric #0	Send the remaining IVRs	

Element: Result /Competitor (1,1) Competitor related to the result of one event unit.				
Attribute M/O Value Description				
Code	М	-	Competitor's ID or TBD in case that the competitor is unknown at this time but will be available Competitor's ID In case Decision=(BYE or BBY) Code=NOCOMP	
Туре	М	S(1)	A for athlete	
Organisation	0	CC @Organisation	Competitor's organisation	

Element: Result /Competitor /Composition /Athlete (1,N)				
Attribute	M/O	Value	Description	
Code	М	S(20) with no leading zeroes	Athlete's ID.	
Order	М	Numeric	Order attribute used to sort. Send 1 if Competitor @Type="A".	
Bib	0	S(4)	Bib number	

Element: Result /Competitor /Composition /Athlete /Description (1,1)				
Athletes extended information.				
Attribute	M/O	Value	Description	
GivenName	0	S(25)	Given name in WNPA format (mixed case)	
FamilyName	М	S(25)	Family name in WNPA format (mixed case)	
Gender	M	CC @PersonGender	Gender of the athlete	
Organisation	М	CC @Organisation	Athletes' organisation	
BirthDate	0	Date	Birth date (example: YYYY-MM-DD). Must include if the data is available	
IFId	0	S(16)	International Federation ID	
Class	0	CC @SportClass	Code to identify the sport class in the case of events with athletes with a disability (e.g. Paralympic Games).	

Elem	Element: Result /Competitor /Composition /Athlete /EventUnitEntry (0,N)					
Indiv	Individual athletes entry information.					
	Type Code Pos Description					
EUE		COLOUR	N/A	Element Expected: As soon as it is available.		
	Attribute	M/O	Value	Description		
	Value	М	SC @Colour	Athlete's colour		

2.2.3.5 Message Sort

Sort by Result @SortOrder

2.2.4 Play by Play

2.2.4.1 Description

The Play by Play is a message containing official raw data from the results provider for each action.

The message contains a generic definition that can be used to provide results data of different nature as well as all of the actions in a unit.

2.2.4.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment	
CompetitionCode	CC @Competition	Unique ID for competition	
DocumentCode	Full RSC	RSC of the unit	
DocumentSubcode	Not used	Not used	
DocumentType	DT_PLAY_BY_PLAY	Play by Play message	
DocumentSubtype	S(8)	Send "ACTION"	
Version	1V	Version number associated to the message's content. Ascendant number	
ResultStatus	SC @ResultStatus	Status of the message. Possible values are: START_LIST (only used if there are actions before the start) LIVE (used during the competition when nothing else applies) INTERMEDIATE UNOFFICIAL OFFICIAL (when results official)	
FeedFlag	"P"-Production "T"-Test	Test message or production message.	
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.	
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.	

Attribute	Value	Comment
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).
		The end of the logical day is defined by default at 03:00 a.m.
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.
		Logical Date is expressed in the local time zone where the message was produced.
Source	SC @Source	Code indicating the system which generated the message.

2.2.4.3 Trigger and Frequency

This message is sent:

• LIVE: When the contest starts

• LIVE: After every action

• UNOFFICIAL/OFFICIAL: After the contest (unit)

2.2.4.4 Message Values

Element: ExtendedInfos /SportDescription (0,1)				
Attribute	M/O	Value	Description

Organisation	М	CC @Organisation	Competitors' organisation			

Element: Actions /Action /Competitor /Composition /Athlete (1,N)							
Attribute	M/O	Value	Description				
Code	М	S(20) with no leading zeroes	Athlete's ID (individual athlete) related to the action				
Order	0	Numeric 0	Send 1 for athlete				

Element: Actions /Action /Competitor /Composition /Athlete /Description (1,1) Athletes extended information							
Attribute	M/O	Value	Description				
GivenName	0	S(25)	Given name in WNPA format (mixed case)				
FamilyName	М	S(25)	Family name in WNPA format (mixed case)				
Gender	М	CC @PersonGender	Gender of the athlete				
Organisation	M	CC @Organisation	Athletes' organisation				
BirthDate	0	Date	Birth date (example: YYYY-MM-DD). Must include if the data is available				
IFId	0	S(16)	International Federation ID				
Class	0	CC @SportClass	Code to identify the sport class in the case of events with athletes with a disability (e.g. Paralympic Games).				

2.2.4.5 Message Sort

Actions /Action @Order followed by @Pos

2.2.5 Brackets

2.2.5.1 Description

The brackets message contains the brackets information for one particular event. It is used in events where there is a necessity to know in advance how successive event units will be filled as the competition progresses. In the early stages of the competition, it indicates how each of the event units will be built from the winners/losers, or other competition rules of the previous event units.

2.2.5.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment	
CompetitionCode	CC @Competition	Unique ID for competition	
DocumentCode	Full RSC	Full RSC of the event	
DocumentType	DT_BRACKETS	Brackets message	
Version	1V	Version number associated to the message's content. Ascendant number	
ResultStatus	SC @ResultStatus	Status of the message. Expected statuses are: START_LIST (when the draw initially made) INTERMEDIATE (during the competition) OFFICIAL (when all matches official)	
FeedFlag	"P"-Production "T"-Test	Test message or production message.	
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.	
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.	
LogicalDate	Logical Date of events. This is the same as the unit or message transmission extends of an event unit continues after midnight (2) will be considered as happening at the logunit began (e.g. for a session which began at 1:20 on Aug 3, the message will all be date.		
		The end of the logical day is defined by default at 03:00 a.m.	
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction. Logical Date is expressed in the local time zone where the message was produced.	
Source	SC @Source	Code indicating the system which generated the message.	

2.2.5.3 Trigger and Frequency

This message should be sent at the very beginning of a competition, as soon as brackets are available.

Send when a match/event unit is completed for unofficial & official status. Therefore it is triggered up to two times for each event unit (unless there is no change from unofficial to official as duplicates are not expected). The message should be updated including information on each competitor in the different bracket items.

The @ResultStatus attribute will vary depending on the competition status.

- Send with ResultStatus = 'INTERMEDIATE' from the first version until the last event unit (Gold Medal Match) is Unofficial (i.e. for all event units up until the Gold Medal match is completed for an event)
- Send with ResultStatus = "UNOFFICIAL" when the last event unit for an event (Gold Medal match) has Unofficial status.
- Send with ResultStatus = 'OFFICIAL' when the last event unit for an event (Gold Medal match) has Official status.

Trigger also after any change.

2.2.5.4 Message Values

Element: ExtendedInfos /SportDescription (0,1)						
Attribute	M/O	Value	Description			
DisciplineName	М	S(40)	Discipline name (not code) from Common Codes			
EventName	М	S(40)	Event name (not code) from Common Codes.			
Gender	М	CC @DisciplineGender	Gender code for the event unit			

Element: ExtendedInfos /VenueDescription (0,1)					
Attribute	M/O	Value	Description		
Venue	М	CC @VenueCode	Venue code		
VenueName	М	S(25)	Venue short name (not code) from Common Codes		

Element: Bracket (1,N)								
Attribute	M/O	Value	Description					
Code	M	SC @Bracket	Bracket code to identify a bracket item (finals). There should be a different code for each bracket based on sport/ORIS presentation of the bracket.					

Element: Bracket /BracketItems (1,N)								
Attribute	M/O	Value			Descrip	otion		
Code	M	SC @BracketItems		BracketItems ed by their SC (all	BracketItem

Element: Bracket /Bra	Element: Bracket /BracketItems /BracketItem (1,N)							
Attribute	M/O	Value	Description					
Code	0	Numeric or TBD	It will be sent the contest for each bracket item (e.g.: 314, 315,) However, it may include "TBD" for to be defined, if the bout number is not known.					
Order	М	Numeric	Sequential number inside of BracketItems to indicate the order, always start at 1					
Position	М	Numeric #0	Bracket position when drawing the bracket. For example, a quarter final has 4 items, with positions 1, 2, 3 and 4 from the top. Use the appropriate number to draw the position.					
Date	0	Date	Date of match (example: YYYY-MM-DD). Must include if the data is available					
Time	0	S(5)	Time of match (example HH:MM). Must include if the data is available.					
Unit	0	CC @Unit	Full RSC of the unit for the BracketItem					
Result	0	S(50)	Result of the match if match is complete and formatted as in ORIS (example GDP $1:0,3:3$ (4 $1:11$)). Must include if the data is available and the match is complete.					

	Element: Bracket /BracketItems /BracketItem /ExtBracketItems /ExtBracketItem (1,N) ExtBracketItems /ExtBracketItem are optional elements according to competitors' rules.							
	Type	Code	Pos	Description				
EBI		SESSIONTYPE	N/A	Element Expected: Just when available				
	Attribute	M/O	Value	Description				
	Value	М	CC @SessionType	Session Type like in C75 (ORIS) -morning or afternoon.				
EBI		DECISION	N/A	Element Expected: When available				
	Attribute	M/O	Value	Description				
	Value	М	SC @ResultCode	Decision of the match				

Element: Bracket / BracketItems / BracketItem / CompetitorPlace (1,N)

- If the competitors are known, this element is used to place the competitors in the bracket.
- If they are not yet known, it contains some information (on the rule to access to this bracket...)

Attribute	M/O	Value	Description
Pos	M	Numeric ###	This attribute is a sequential number to place the different competitors in the bracket (1, 2).
Code	0	SC @CompetitorPlace	Send when there is no competitor (BYE) - also for the repechage bracket with no competitors. or when it is not known yet (TBD) or when both athletes are disqualified or Withdraw and "No contestant" passes to the next round.
WLT	0	SC @WLT	W, L Indicates the winner or loser of the bracket item. Always send when known
Result	0	S(10)	The result of the competitor in the event unit. Points scored.
IRM	0	SC @IRM	The invalid rank mark, if applicable
StrikeOut	0	S(1)	If the competitor should be struck out in this bracket item send Y, usually only used for DQB.

Elem	Element: Bracket /BracketItems /BracketItem /CompetitorPlace /ExtCompPlaces /ExtCompPlace (1,N)				
	Type	Code	Pos	Description	
ECP		DESC	N/A	Element Expected: Just when the competitor is not known yet and only for repechages. (when the CompetitorPlace @Code is TBD and only for the Repechage and only for the bracket waiting direct competitor from the final bracket's phases)	
	Attribute	M/O	Value	Description	
	Value	0	S(50)	Send the description of the competitor to be replaced in Repechage. For example: "Loser in SF from Pool B"	

Element: Bracket /BracketItems /BracketItem /CompetitorPlace /PreviousUnit (0,1)

Previous event unit related to the CompetitorPlace@Pos competitor of the current bracket item. It is always informed except for the bracket items whose CompetitorPlace@Pos competitor do not have preceding event units in the bracket graph unless coming from a pool.

Attribute	M/O	Value	Description
Unit	О	CC @Unit	Full RSC code of the previous event unit for the CompetitorPlace@Pos competitor of the bracket item. Must send if a winner/loser from a single unit. If from a pool then this is the RSC of the pool.
WLT	0	SC @WLT	If the competitor in the current unit is unknown and coming from an earlier bracketitem then fill this field with the W or L indication winner or loser of the previous unit if the information is known. Do

not send if competitor comes from a pool.	
-------------------------------------------	--

Element: Bracket /BracketItems /BracketItem /CompetitorPlace /Competitor (0,1) CompetitorPlace @Pos competitor related to the bracket item. Only include if the competitor is known.				
Attribute	M/O	Value	Description	
Code	М	S(20) with no leading zeroes	Competitor's ID	
Туре	М	A	A for athlete	
Seed	0	S(10)	The seed of the competitor if applicable	
Organisation	0	CC @Organisation	Competitors' organisation if known	

Element: Bracket /BracketItems /BracketItem /CompetitorPlace /Competitor /Composition /Athlete (1,N)				
Attribute	M/O	Value	Description	
Code	М	-	Athlete's ID, corresponding to either a team member or an individual athlete	
Order	M	Numeric	Order attribute use 1 if Competitor @Type="A".	

Element: Bracket / Bracket Bracket Competitor Competitor Composition Athlete Description (1,1)				
Attribute	M/O	Value	Description	
GivenName	О	S(25)	Given name in WNPA format (mixed case)

```

2.2.5.5 Message Sort

The following order applies:

- Bracket @Code if more than one.
- BracketItems according to its @Code attribute.
- Then, the BracketItem /Unit @Unit are sorted according to their scheduled start time.

2.2.6 Statistics

2.2.6.1 Description

The Statistics message contains a list of statistics for a competitor (could be an individual athlete or a team), that applies at a DocumentCode level.

2.2.6.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment	
CompetitionCode	CC @Competition	Unique ID for competition	
DocumentCode	Full RSC	The DocumentCode attribute in the ODF header will be sent according for all the competition events to the ODF header values.	
DocumentSubcode	Not used.	Not used.	
DocumentType	DT_STATS	Statistics message	
DocumentSubtype	TOU	TOU: Tournament statistics	
Version	1V	Version number associated to the message's content. Ascendant number	
ResultStatus	SC @ResultStatus	It indicates whether the result is official or intermediate etc). LIVE (used during the competition when nothing else applies) INTERMEDIATE (used after the competition has started and is not finished but not currently live, typically between units) OFFICIAL (after the last unit which effects the statistics is official)	
FeedFlag	"P"-Production "T"-Test	Test message or production message.	
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.	
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.	
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.	
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).	
		The end of the logical day is defined by default at 03:00 a.m.	
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.	
		Logical Date is expressed in the local time zone where the message was produced.	

Attribute	Value	Comment
Source	SC @Source	Code indicating the system which generated the message.

2.2.6.3 Trigger and Frequency

This message has to be sent twice at the end each unit, both at gender level and event level.

2.2.6.4 Message Values

Element: ExtendedInfos /SportDescription (0,1)

2.2.6.5 Message Sort

Sort according to the @Order attributes.

2.2.7 Event Final Ranking

2.2.7.1 Description

The event final ranking is a message containing the final results and ranking at the completion of one particular event, either for individual athletes or for aggregated athletes.

The final ranking message is a generic message for all sports, including the full event final result for all competitors who were either ranked, got an Invalid Rank Mark (disqualified, etc.), or both.

2.2.7.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment
CompetitionCode	CC @Competition	Unique ID for competition
DocumentCode	Full RSC of the Event	
DocumentType	DT_RANKING	Event Final ranking message
Version	1V	Version number associated to the message's content. Ascendant number
ResultStatus	SC @ResultStatus	Result status, indicates whether the data is official or partial. OFFICIAL PARTIAL
FeedFlag	"P"-Production "T"-Test	Test message or production message.
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.

Attribute	Value	Comment
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).
		The end of the logical day is defined by default at 03:00 a.m.
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.
		Logical Date is expressed in the local time zone where the message was produced.
Source	SC @Source	Code indicating the system which generated the message.

2.2.7.3 Trigger and Frequency

This message is only triggered after a unit which affects the final ranking is official and that particular ranking is not subject to change.

- -After the event is finished (OFFICIAL)
- -After any final ranking is known (PARTIAL)

Trigger also after any change.

2.2.7.4 Message Values

Element: ExtendedInfos /SportDescription (0,1)			
Sport Description	in text		
Attribute	M/O	Value	Description
DisciplineName	М	S(40)	Discipline name (not code) from Common Codes
EventName	М	S(40)	Event name (not code) from Common Codes. Must be included if it is a single event
Gender	М	CC @DisciplineGender	Gender code for the event unit. Must be included if it is a single gender

Element: ExtendedInfos / VenueDescription (0,1)			
Attribute	M/O	Value	Description
Venue	М	CC @VenueCode	Venue code
VenueName	М	S(25)	Venue short name (not code) from Common Codes

Element: Result (1,N)				
For any event final	For any event final ranking message, there should be at least one competitor being awarded a result for the event.			
Attribute	M/O	Value	Description	
Rank	0	Text	Final rank of the competitor in the corresponding event. It is optional because the competitor can be disqualified.	
RankEqual	0	S(1)	Identifies if a rank has been equalled. Send Y if applicable	
IRM	0	SC @IRM	The invalid rank mark, send if applicable.	
SortOrder	М	Numeric	This attribute is a sequential number with the order of the results for the particular event, if they were to be presented. It is mostly based on the rank, but it should be used to sort out rank ties as well as results without rank.	

Element: Result /Competitor (1,1)				
Attribute	M/O	Value	Description	
Code	M	S(20) with no leading zeroes or NOCOMP	Competitor's ID. If NOC or NPC, the value will be NOC ID. "NOCOMP" in the case where there is no competitor in the rank due to IRM.	
Туре	М	A	A for athlete	
Organisation	0	CC @Organisation	Competitors' organisation if known	

Element: Result /Competitor /Composition /Athlete (1,N)				
Attribute	M/O	Value	Description	
Code	М	S(20) with no leading zeroes	Athlete's ID	
Order	М	Numeric	Order attribute. Send 1 when Competitor @Type="A".	

Element: Result /Competitor /Composition /Athlete /Description (1,1)				
Attribute	M/O	Value	Description	
GivenName	0	S(25)	Given name in WNPA format (mixed case)	
FamilyName	М	S(25)	Family name in WNPA format (mixed case)	
Gender	М	CC @PersonGender	Gender of the athlete	
Organisation	М	CC @Organisation	Athletes' organisation	
BirthDate	0	Date	Birth date (example: YYYY-MM-DD). Must include if the data is available	
IFId	0	S(16)	International Federation ID	
Class	0	CC @SportClass	Code to identify the sport class in the case of events with athletes with a disability (e.g: Paralympic Games).

2.2.8 Configuration

2.2.8.1 Description

The Configuration is a message containing general configuration.

Ideally the configuration should be provided before competition. However it may be possible that the configuration for one particular event. Send one message per event.

2.2.8.2 Header Values

The following table describes the message header attributes.

Attribute	Value	Comment	
CompetitionCode	CC @Competition	Unique ID for competition	
DocumentCode	Full RSC	The DocumentCode will be at event level.	
DocumentType	DT_CONFIG	Configuration message	
Version	1V	Version number associated to the message's content. Ascendant number	
FeedFlag	"P"-Production "T"-Test	Test message or production message.	
Date	Date	Date when the message is generated, expressed in the local time zone where the message was produced.	
Time	Time	Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.	
LogicalDate	Date	Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.	
		If an event unit continues after midnight (24:00), all messages produced will be considered as happening at the logical date on which the event unit began (e.g. for a session which began at 21:00 on Aug 2 and ended at 1:20 on Aug 3, the message will all be dated Aug 2).	
		The end of the logical day is defined by default at 03:00 a.m.	
		For messages corrections, like invalidating medals or Records, it will be the LogicalDate of the day of the correction.	
		Logical Date is expressed in the local time zone where the message was produced.	
Source	SC @Source	Code indicating the system which generated the message.	

2.2.8.3 Trigger and Frequency

Follow the general definition, send before each event starts.

Trigger also after any change, but considering that, if possible, the configuration for one particular event, phase or event unit must be provided before the start list. If this message is updated after the start list then DT_RESULT must be resent.

2.2.8.4 Message Values

Element: Configs /Config (1,N)				
Attribute	M/O	Value	Description	
Unit	0	CC @Unit	Full RSC at event level.
