# 1 Introduction

## 1.1 This document

This document includes the ODF Fencing Data Dictionary. This Data Dictionary refines the messages described in the ODF General Messages Interface Document specifically for this discipline.

## 1.2 Objective

The objective of this document is to provide a complete and formal definition of the ODF Fencing Data Dictionary, with the intention that the information message producer and the message consumer can successfully interchange the information as the competition is run.

### 1.3 Main Audience

The main audience of this document is the IOC as the ODF promoter, ODF users such as the World News Press Agencies, Rights Holding Broadcasters and International Sports Federations.

### 1.4 Glossary

The following abbreviations are used in this document.

| Acronym | Description                     |

## 2 Messages

### 2.1 Fencing Overview

MESSAGES IN EACH EVENT

\* All events (individual and team) have a single DT\_RESULT and DT\_PLAY\_BY\_PLAY for each unit.

\* There is also a DT\_BRACKET message for the progression.

SCHEDULE

The DT\_SCHEDULE/DT\_SCHEDULE\_UPDATE message will include each unit (schedule=Y) only which is aligned with the same RSC for DT\_RESULT.

PARALYMPIC GAMES

Athlete class is added.

### 2.2 Applicable Messages

The following table is a full list of all ODF messages and describes the list of messages used in this discipline.

- The column “Message type“ indicates the DocumentType that identifies a message
- The column “Message name“ is the message name identified by the message type
- The column “Message extended“ indicates whether a particular message has extended definition in regards to those that are general for all sports. If one particular message is not extended, then it follows the general definition rules.
- Message responsibilities appears in the ODF General Document.

## 2.3 Messages

### 2.3.1 Competition schedule / Competition schedule update

#### 2.3.1.1 Description

The Competition schedule is a bulk message provided for one discipline. As a general rule, it contains the complete schedule information for all event units needed to run a competition and excludes event units for activities such as unofficial training and press conferences.

This message contains the competition timetable for a complete discipline as well as status for each competition unit and is updated from OVR via the schedule update message.

All event units in codes which have the 'schedule' flag set to 'Y' or 'S' are included in schedule messages regardless of status (those without status must be sent as UNSCHEDULED if the schedule flag is 'Y' or 'S').

The arrival of the competition schedule message resets all the previous schedule information for one discipline.

The StartList component of the message is only included in the case that the Unit Type is one of HATH, HCOUP or HTEAM and at least one of the competitors are known.

The Composition component (i.e. listing athletes) is only included in the case that the Unit Type is one of HATH or HCOUP.

For reference the applicable unit types (from common codes) are:

- HATH Individual Head to Head units (e.g. ARC, BDM, TEN, SBD etc)
- HCOUP Pairs/Couples Head to Head units (e.g. BDM, TEN etc)
- HTEAM Teams Head to Head units (e.g. BKB, VBV, HBL, CUR, IHO etc)

Managing when start times are not known.

In some disciplines the start time of each unit is not known and the unit are managed by order rather than time.

In these disciplines only the time of the first unit (or first unit per location) is known and distributed. In this case all units should be sent with the same start time and those following units flagged as HideStartDate (and finish). To be able to correctly order these units then the Order attribute is used (and must be sent from the venue).

To ensure there are no incorrectly ordered units then the start time must not be updated to the actual start time (there is an actual start time field to cater for this). For example:

| Start Time | Display in message | Unit           | HideStartDate | Location | Order |
|------------|--------------------|----------------|---------------|----------|-------|
| 12:00      | 12:00              | Unit 1         | N             | Court 2  | 1     |
| 12:00      | Match 2            | Court 2 Unit 2 | Y             | Court 2  | 2     |
| 12:00      | Match 3            | Court 2 Unit 3 | Y             | Court 2  | 3     |
| 16:30      | Not before 16:30   | Unit 4         | Y             | Court 2  | 4     |

If the discipline requires some text describing the order then StartText is used. Typical uses include "Not before 17:00" or "SUN 29 - 2nd match on CC" or "Follows".

Advice for end users - how to sort event units and use DT\_SCHEDULE:

- When displaying the schedule users must use the following sort order to display as intended:

Where the discipline is defined as LOC:

1. By day (or filter by day)
2. Session Code
3. By location
4. By Time (regardless if HideStartDate="Y")
5. By Order

Where the discipline is defined as SESSION OR DATE:

1. By day (or filter by day)
2. Session Code
3. By Time (regardless if HideStartDate="Y")
4. By Order

- The Order can be match number for simplicity and show correct order for two matches at the same time.
- End users should display StartText if HideStartDate="Y"

If a StartText value of "Not before hh:mm" is used then it is expected that the StartDate sent is the same hh:mm.

Competition schedule update:

Competition schedule update is an update message. It is not a complete schedule information message, but only the schedule data being modified.

The arrival of this message updates the previous schedule information for one particular event unit(s) or sessions(s), but does not notify any other change for the rest of the event units/sessions except for those contained in the message.

The key of the information updated is Unit @Code. Therefore, any new unit, deleted unit or updated unit will be identified by all this attribute.

It has to be understood that if one DT\_SCHEDULE message arrives, then all previous DT\_SCHEDULE\_UPDATE messages should be discarded.

When message is sent from Competition Schedule application in advance of the Games the element ExtendedInfos/EntendedInfo will contain following information:

- Type=CS, Code=VERSION, the attribute Value will indicate the version details from the competition schedule application
- Type=CS, Code=STATUS the attribute Value will indicate the status details from the competition schedule application

### 2.3.1.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                             | Comment  |
|-----------------|-----------------------------------|--|
| CompetitionCode | CC @Competition                   | Unique ID for competition  |
| DocumentCode    | CC @Discipline                    | Full RSC at the discipline level                                     |
| DocumentType    | DT_SCHEDULE<br>DT_SCHEDULE_UPDATE | / Competition schedule bulk / update                                 |
| Version         | 1...V                             | Version number associated to the message's content. Ascending number |
| FeedFlag        | "P" - Production<br>"T" - Test    | Test message or production message.                                  |

|             |            |   |
|-------------|------------|---|
| Date        | Date       | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time        | Time       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate | Date       | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight. See full explanation in ODF Foundation. |
| Source      | SC @Source | Code indicating the system which generated the message.   |

### 2.3.1.3 Trigger and Frequency

The competition schedule will be sent as a bulk message (DocumentType="DT\_SCHEDULE") when available before the Games and then sent multiple times until a date to be confirmed after which only update messages will be sent (DocumentType="DT\_SCHEDULE\_UPDATE") by OVR. There is no automatic triggering and this (DT\_SCHEDULE) message must not be sent after the transfer of control to OVR.

The competition schedule update message should be triggered at any time there has been a competition schedule modification for any previously sent competition schedule bulk message or update message including the addition of start list details (H2H).

Generally start list details for H2H units should be sent immediately when officially known, which should be as soon as possible after the preceding unit changes to official.

The triggers for status changes are described in each sport data dictionary where differences are needed.

If any text descriptions change in a message (as opposed to the code) then this message is not resent to correct previous messages however the new data is to be used in future messages.

### 2.3.1.4 Message Structure

The following table defines the structure of the message.

| Level 1           | Level 2       | Level 3               | Level 4 | Level 5 | Level 6 | Level 7 | Level 8 | Level 9 |
|-------------------|---------------|-----------------------|---------|---------|---------|---------|---------|---------|
| Competition (0,1) |               |                       |         |         |         |         |         |         |
|                   | Gen           |                       |         |         |         |         |         |         |
|                   | Sport         |                       |         |         |         |         |         |         |
|                   | Codes         |                       |         |         |         |         |         |         |
|                   | Session (0,N) |                       |         |         |         |         |         |         |
|                   |               | SessionCode           |         |         |         |         |         |         |

### 2.3.1.6 Message Sort

Sort by Session @SessionCode.

The message is sorted by Unit@StartDate then by Unit@Order then Unit@Code.  
In case of event unit with no Unit@StartDate defined (example, they are in an event unit status such as UNSCHEDULED), they will be listed at the end in Unit@Code order.

## 2.3.2 List of participants by discipline / List of participants by discipline update

### 2.3.2.1 Description

A participant is considered to be any individual (type athlete, participating or not in the current games) or any official in one or several disciplines or a competitor being part of a team (team member).

Although the participant may participate in more than one event or more than one discipline, this message just contains the information for the discipline of the message, listing the information of all the events for that discipline.

This message includes historical athletes that do not participate in the current competition. Historical athletes will not be registered to any event.

It is important to note that all the sport messages that make references to athletes (event unit start list and results, phase results, medallists etc.) will always match the athlete ID with the athlete ID in this message. The historical athletes will be used to match historical athlete information as it appears in the records message when sending the previous record information and this previous record was an historical record not being broken in the current competition.

List of participants by discipline (DT\_PARTIC) is a bulk message, provided for each discipline. It is a complete participant information message for one particular discipline. The arrival of this message resets all the previous participants' information for one particular discipline. This message includes a list of current athletes, officials, coaches, guides, technical officials, reserves and historical athletes regardless of their status.

List of participants by discipline update (DT\_PARTIC\_UPDATE) is an update message. It is not a complete list of participants' information by discipline message, only the participant data being modified, i.e. if some data of one participant changes, the element Participant for it with all its children and attributes must be sent.

The key of the information updated consists of the following attribute: Participant @Code. Therefore, any new or updated Participant Discipline-Event will be identified by all these attributes.

### 2.3.2.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                          | Comment  |
|-----------------|--------------------------------|--|
| CompetitionCode | CC @Competition                | Unique ID for competition  |
| DocumentCode    | CC @Discipline                 | Full RSC at the discipline level   |
| DocumentType    | DT_PARTIC<br>DT_PARTIC_UPDATE  | / List of participants by discipline message   |
| DocumentSubtype | S(20)                          | HISTORICAL if the message is from the historical results provider and only includes historic athletes else the attribute is not included. Never included in _UPDATE message. |
| Version         | 1..V                           | Version number associated to the message's content. Ascending number   |
| FeedFlag        | "P" - Production<br>"T" - Test | Test message or production message.  |
| Date            | Date                           | Date when the message is generated, expressed in the local time zone where the message was produced.   |
| Time            | Time                           | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.  |

|             |            |   |
|-------------|------------|---|
| LogicalDate | Date       | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight. See full explanation in ODF Foundation. |
| Source      | SC @Source | Code indicating the system which generated the message.   |

### 2.3.2.3 Trigger and Frequency

The DT\_PARTIC message is sent as a bulk message prior to the Games. It is sent several times up to the date of transfer of control to OVR after which only DT\_PARTIC\_UPDATE messages are sent.

The DT\_PARTIC\_UPDATE message is triggered when there is a modification in the data for any individual after the transfer of control to OVR.

### 2.3.2.4 Message Structure

The following table defines the structure of the message.

### 2.3.2.6 Message Sort

The message is sorted by Participant @Code

## 2.3.3 List of teams / List of teams update

### 2.3.3.1 Description

DT\_PARTIC\_TEAMS contains the list of teams related to the current competition.

List of teams (DT\_PARTIC\_TEAMS) is a bulk message by discipline. The list is always complete. The arrival of this message resets all the previous participant teams' information for that discipline. It is assumed that all teams appearing in this list are valid, in the meaning that they are participating or they could participate in one event.

List of teams update (DT\_PARTIC\_TEAMS\_UPDATE) is an update message. It is not a complete list of teams' information message. It only contains the data of a team being modified.

### 2.3.3.2 Header Values

The following table describes the message header attributes.

### 2.3.3.3 Trigger and Frequency

The DT\_PARTIC\_TEAMS message is sent as a bulk message before the Games. It is sent several times up to the date of transfer of control to OVR after which only DT\_PARTIC\_TEAMS\_UPDATE messages are sent.

The DT\_PARTIC\_TEAMS\_UPDATE message is triggered when there is a modification in the data for any team after the transfer of control to OVR.

### 2.3.3.6 Message Sort

The message is sorted by Team @Code.

## 2.3.4 Event Unit Start List and Results

### 2.3.4.1 Description

The Event Unit Start List and Results is a message containing both the start list and results information of the competitors in one (individual or team) event unit.

The Event Unit Start List and Results is a mandatory message for all sports. The definition includes as much generic information as possible due to the fact that each discipline and event has its own format for the results information (example: score of a match, time in a race, distance in a throw...).

This is always a full message and all applicable elements and attributes are always sent.

### 2.3.4.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                          | Comment  |

### 2.3.4.3 Trigger and Frequency

This message is sent with ResultStatus 'START\_LIST' as soon as the start list information is available and for any change to this information or if there are any cards before the unit starts.

This message is then sent with ResultStatus 'LIVE' as soon as the unit starts and continues to be triggered on all updates:

- At the start of the competition (LIVE)
- With every change in any data (LIVE)
- In case of Toss please send the message as soon the Priority winner is known.

This message is also sent when the event unit finishes and the results are still unofficial. Also, this message is

expected when the results become official. The official/unofficial status is included in the ODF headers (ResultStatus attribute).

The message is sent as 'INTERMEDIATE' during extended breaks.

Trigger also after any change.

## 2.3.6 Pool Standings

### 2.3.6.1 Description

The pool standings message contains the standings of a group in a competition. It is similar to the Phase Results message, except in the frequency and trigger. Here the message is triggered at the start of OVR operations and then after each event unit (match).

This report is sent independently for each of the groups / pools of the competition in a particular phase, and the group / pool can be determined from the message header (DocumentCode).

This message is only used where the competition format uses pools. (Individual in the European Games).

### 2.3.6.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                      | Comment  |
|-----------------|----------------------------|--|
| CompetitionCode | CC @Competition            | Unique ID for competition  |

### 2.3.6.3 Trigger and Frequency

The general rule is that this message is sent:

- Before the start of the competition to build in the initial tables. The message has status START\_LIST.
- When an event unit of the corresponding phase finishes (not waiting for official). The message has status INTERMEDIATE.
- When the phase finishes (there are no more event units/games to compete). The message has status OFFICIAL.

Trigger also after any change but not updated during a match with real time results.

### 2.3.6.5 Message Sort

The attribute used to sort the results is Result @SortOrder.

## 2.3.7 Brackets

### 2.3.7.1 Description

The brackets message contains the brackets information for one particular event. It is used in events where there is a necessity to know in advance how successive event units will be filled as the competition progresses. In the early stages of the competition, it indicates how each of the event units will be built from the winners/losers, or other competition rules of the previous event units.

### 2.3.7.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                          | Comment  |
|-----------------|--------------------------------|--|
| CompetitionCode | CC @Competition                | Unique ID for competition  |
| DocumentCode    | CC @Event                      | Full RSC of the Event  |
| DocumentType    | DT_BRACKETS                    | Brackets message   |
| Version         | 1..V                           | Version number associated to the message's content. Ascending number   |
| ResultStatus    | CC @ResultStatus               | Status of the message. Expected statuses are:<br>START_LIST (before any unit is complete)<br>INTERMEDIATE (after any unit is complete, except last match)<br>UNOFFICIAL (when last match unofficial)<br>OFFICIAL (when all matches official) |
| FeedFlag        | "P" - Production<br>"T" - Test | Test message or production message.  |
| Date            | Date                           | Date when the message is generated, expressed in the local time zone where the message was produced.   |
| Time            | Time                           | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.  |
| LogicalDate     | Date                           | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight. See full explanation in ODF Foundation.  |
| Source          | SC @Source                     | Code indicating the system which generated the message.  |

### 2.3.7.3 Trigger and Frequency

This message should be sent at the very beginning of a competition, as soon as brackets are available after the draw.

Send when a match/event unit is completed, including Official status. Therefore it is triggered up to two times (with both status) for each event unit but only if there is a change from the previous version. The message should be updated including information on each competitor in the different bracket items.

The @ResultStatus attribute will vary depending on the competition status.

- Send with ResultStatus = 'START\_LIST' before the start of competition
- Send with ResultStatus = 'INTERMEDIATE' until the last event unit (Gold Medal Match) is Unofficial (i.e. for all event units up until the Gold Medal match is completed for an event)
- Send with ResultStatus = 'UNOFFICIAL'/'OFFICIAL' when the last event unit for an event (Gold Medal match) is completed.

Trigger also after any change.

### 2.3.7.4 Message Structure

The following table defines the structure of the message.

| Level 1           | Level 2                | Level 3               | Level 4    | Level 5 | Level 6 | Level 7 | Level 8 | Level 9 | Level 10 |

## 2.3.8 Event Final Ranking

### 2.3.8.1 Description

The event final ranking is a message containing the final results and ranking at the completion of one particular event, either for individual athletes or for aggregated athletes.

The final ranking message is a generic message for all sports, including the full event final result for all competitors who were either ranked, got an Invalid Rank Mark (disqualified, etc.), or both.

### 2.3.8.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                          | Comment  |
|-----------------|--------------------------------|--|
| CompetitionCode | CC @Competition                | Unique ID for competition  |
| DocumentCode    | CC @Event                      | Full RSC of the Event  |
| DocumentType    | DT_RANKING                     | Event Final ranking message  |
| Version         | 1..V                           | Version number associated to the message's content. Ascending number   |
| ResultStatus    | CC @ResultStatus               | Result status, indicates whether the data is official or partial.<br>PARTIAL<br>UNOFFICIAL<br>OFFICIAL   |
| FeedFlag        | "P" - Production<br>"T" - Test | Test message or production message.  |
| Date            | Date                           | Date when the message is generated, expressed in the local time zone where the message was produced.   |
| Time            | Time                           | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.  |
| LogicalDate     | Date                           | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation. |
| Source          | SC @Source                     | Code indicating the system which generated the message.  |

### 2.3.8.3 Trigger and Frequency

This message is only triggered after a unit which affects the final ranking is official and that particular ranking is not subject to change.

Send as PARTIAL as each ranking is inserted until OFFICIAL after the event when all final rankings are known.

UNOFFICIAL may be used after the gold medal unit and before the unit is official.

Trigger also after any change.

### 2.3.8.4 Message Structure

The following table defines the structure of the message.

## 2.3.9 Event's Medallists

### 2.3.9.1 Description

The Event's Medallists is a message containing the list of medallists awarded in one particular event.

### 2.3.9.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                          | Comment  |
|-----------------|--------------------------------|--|
| CompetitionCode | CC @Competition                | Unique ID for competition  |
| DocumentCode    | CC @Event                      | Full RSC at event level  |
| DocumentType    | DT_MEDALLISTS                  | Event's Medallists message   |

| Date            | Date                           | Date when the message is generated, expressed in the local time zone where the message was produced.   |
| Time            | Time                           | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.  |
| LogicalDate     | Date                           | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation. |
| Source          | SC @Source                     | Code indicating the system which generated the message.  |

### 2.3.9.3 Trigger and Frequency

The message is sent with ResultStatus=PARTIAL when the information of the medallist is known but the final event Unit is not yet finished.

Sent immediately after the unit is finished and the results are unofficial or in the case of longer duration events send before the unit is finished but as soon as the medallists are confirmed. In case of any delay in publishing unofficial results it must be sent at the latest 5 minutes before any ceremony starts with Status=UNOFFICIAL. To be clear, this message must be sent before any ceremony.

The message is sent with ResultStatus=OFFICIAL when the medallists are officially known in the sport.

For some sports, bronze medals are known before the end of the final event unit. In this case the message is sent the first time with the bronze medallists, and the second time with all the medallists.

In summary:

- Normal case (where the results quickly become official): DT\_MEDALLISTS is sent with ResultStatus=OFFICIAL when the event is OFFICIAL
- Separate units to determine all medals: DT\_MEDALLISTS is sent with ResultStatus=PARTIAL after the first unit with medals is complete (with status OFFICIAL or UNOFFICIAL) and then OFFICIAL after event is completed with all units are OFFICIAL.
- Mass start sports when the TD allows to release of medallists: DT\_MEDALLISTS is sent with ResultStatus=UNOFFICIAL before the result is official (or even not all competitors are finished) and OFFICIAL when the medallists are officially known (even if not all competitors are finished).

### 2.3.9.6 Message Sort

The message is sorted according to the medal type. Moreover, in case of tie the order is according to the Competitor@Order (given by the sport rule). Team members are sorted according to the Athlete@Order.

## 2.3.10 Medallists by discipline

### 2.3.10.1 Description

The Medallists by discipline is a message containing the list of medallists for one discipline, up to the moment the message is generated.

The Medallists by discipline message is a complete message that increments its content as more medals are being awarded during the competition. The arrival of this message resets the entire previous Medallists by discipline information.

### 2.3.10.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                          | Comment   |
|-----------------|--------------------------------|---|
| CompetitionCode | CC @Competition                | Unique ID for competition   |
| DocumentCode    | CC @Discipline                 | Full RSC of the Discipline  |

| Version         | 1..V                           | Version number associated to the message's content. Ascending number  |
| FeedFlag        | "P" - Production<br>"T" - Test | Test message or production message.   |
| Date            | Date                           | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time            | Time                           | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate     | Date                           | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight. See full explanation in ODF Foundation. |
| Source          | SC @Source                     | Code indicating the system which generated the message.   |

### 2.3.10.3 Trigger and Frequency

Medallists by Discipline message is sent as soon as one new medal is officially known (but not necessarily awarded) for any of the events that are part of the competition schedule. As the competition progresses, successive changes in the medallists by discipline information are made.

In addition, it is triggered if DT\_MEDALLISTS is sent as UNOFFICIAL (in the mass start events scenario) or PARTIAL (head to head sports). Note that this may lead to the same message being sent twice.

Trigger also after any change.

### 2.3.10.4 Message Structure

### 2.3.10.6 Message Sort

Events in the message will be sorted by the chronological order in which the events took place, (the time is considered to be the actual finish time of the gold medal unit) followed by medal order (gold, silver, bronze) and then by the official result order. Where the message is sent after the bronze unit and before the gold unit then use the actual finish time of the bronze until the gold finish time is known.

## 2.3.11 Configuration

### 2.3.11.1 Description

The Configuration is a message containing general configuration.

Ideally the configuration should be provided before competition. Send one message per event.

### 2.3.11.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                          | Comment   |
|-----------------|--------------------------------|---|
| CompetitionCode | CC @Competition                | Unique ID for competition   |
| DocumentCode    | CC @Event                      | Full RSC at event level   |
| DocumentType    | DT_CONFIG                      | Configuration message   |
| Version         | 1..V                           | Version number associated to the message's content. Ascending number  |
| FeedFlag        | "P" - Production<br>"T" - Test | Test message or production message.   |
| Date            | Date                           | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time            | Time                           | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate     | Date                           | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight. See full explanation in ODF Foundation. |
| Source          | SC @Source                     | Code indicating the system which generated the message.   |

### 2.3.11.3 Trigger and Frequency

Follow the general definition, taking also into account the following:

As soon as the data is known send the message for that event, before sending any DT\_RESULT.

Trigger also after any change, but considering that, if possible, the configuration for one particular event, phase or event unit must be provided before the start list. If the message is sent after any DT\_RESULT then those DT\_RESULT messages must be sent again with the next version.

### 2.3.11.4 Message Structure

The following table defines the structure of the message.
