By using and/or copying all or part of the Document, you (the licensee) agree that you will comply with the following terms and conditions.

- 1. You may, on a non-exclusive basis, use the Document only on the condition that you abide by the terms of this license. Subject to this condition and other terms and restrictions contained herein, the Document and the information contained therein may be used (i) to further develop the standards described in the Document for use in relation with the Olympic and Paralympic Games and/or (ii) to develop similar standards for other events than the Olympic and Paralympic Games (both (i) and (ii) are hereinafter designated as the Permitted Use, and works further developing these standards for the Olympic and Paralympic Games or developing similar standards for other events are hereinafter referred to as Derivative Works), and copies of the Document or of Derivative Works may be made and distributed for the purpose of the Permitted Use, PROVIDED THAT the COPYRIGHT and references to the IOC appearing in the Document and the TERMS OF THIS LICENSE are included on ALL such COPIES, and further PROVIDED THAT you do not charge any fee or any other monetary compensation for the distribution of the Document to others. The copyright and other intellectual property rights in the Document remain vested in the IOC and the IOC remains entitled to assert his copyright or other intellectual property rights in the Document remain
- 2. A copy of any Derivative Work shall be provided to the IOC free of charge. Moreover, the IOC is granted a worldwide, perpetual, unrestricted, royalty-free non-exclusive license to use any Derivative Work for the further development of the standards made by or for the IOC in relation to the Olympic and Paralympic Games (these standards and the documents describing them are hereinafter referred to as Further Standards) and to make or have made all kinds of exploitation of the Further Standards, with the right to grant sub-licenses.
- 3. Except if reproduced in the Document, the use of the name and trademarks of the IOC is strictly prohibited, including, without limitation, for advertising, publicity, or in relation to products or services and their names. Any use of the name or trademarks of the IOC, whether registered or not, shall require the specific written prior permission of the IOC.
- 4. NO WARRANTY, EXPRESSED OR IMPLIED, IS MADE REGARDING THE ACCURACY, ADEQUACY, COMPLETENESS, RELIABILITY OR USEFULNESS OF ANY INFORMATION CONTAINED IN THE DOCUMENT. The Document and the information contained herein are provided on an "as is" basis. THE IOC DISCLAIMS ALL WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY OF NON-INFRINGEMENT OF PROPRIETARY RIGHTS, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL THE IOC BE LIABLE TO ANYONE FOR DAMAGES OF ANY KIND ARISING FROM OR RELATING TO YOUR ACQUISITION, USE, DUPLICATION, DISTRIBUTION, OR EXPLOITATION OF THE DOCUMENT OR ANY PORTION THEREOF, INCLUDING BUT NOT LIMITED TO, COMPENSATORY DAMAGES, LOST PROFITS, LOST DATA OR ANY FORM OF SPECIAL, INCIDENTAL, DIRECT, INDIRECT, CONSEQUENTIAL OR PUNITIVE DAMAGES, WHETHER BASED ON BREACH OF CONTRACT OR WARRANTY, TORT OR OTHERWISE. THE IOC FURTHER DISCLAIMS ANY LIABILITY FOR ANY DAMAGE CAUSED WHEN THE DOCUMENT IS USED IN A DERIVATIVE WORK. The IOC further disclaims any liability regarding the existence or inexistence of any intellectual property or other rights that might be claimed by third parties with respect to the implementation or use of the technology or information described in the Document.

The same conditions as those described in this Section shall apply mutatis mutandis to the license granted to the IOC on the Derivative Works in Section 2 above.

- 5. This License is perpetual subject to your conformance to its terms and conditions. The IOC may terminate this License immediately upon your breach of any of its terms and, upon such termination you will cease all use, duplication, distribution, and/or exploitation in any manner of the Document.
- 6. This License is governed by the laws of Switzerland. You agree that any disputes arising from or relating to this License will be resolved in the courts of Lausanne, Switzerland.

IF YOU DO NOT AGREE TO THESE TERMS YOU MUST CEASE ALL USE OF THE DOCUMENT NOW.

## 1 Introduction

## 1.1 This document

This document includes the ODF Snowboard Data Dictionary. This Data Dictionary refines the messages described in the ODF General Messages Interface Document specifically for this discipline.

## 1.2 Objective

The objective of this document is to provide a complete and formal definition of the ODF Snowboard Data Dictionary, with the intention that the information message producer and the message consumer can successfully interchange the information as the competition is run.

## 1.3 Main Audience

The main audience of this document is the IOC as the ODF promoter, ODF users such as the World News Press Agencies, Rights Holding Broadcasters and International Sports Federations.

## 1.4 Glossary

The following abbreviations are used in this document.

| Acronym | m Description                   |  |
|---------|---------------------------------|--|
| IF      | International Federation        |  |
| IOC     | International Olympic Committee |  |
| NOC     | National Olympic Committee      |  |
| ODF     | Olympic Data Feed               |  |
| RSC     | Results System Codes            |  |
| WNPA    | World News Press Agencies       |  |

## 1.5 Related Documents

| Document Title                 | Document Description  |
|--------------------------------|---|
| ODF Foundation Principles      | The document explains the environment & general principles for ODF                        |
| ODF General Messages Interface | The document describes the ODF General Messages   |
| Common Codes                   | The document describes the ODF Common codes   |
| ODF Header Values              | The document details the header values which shows which RSCs are used in which messages. |
| ORIS Sports Document           | The document details the sport specific requirements                                      |

## 2 Messages

## 2.1 Snowboard Overview

#### MESSAGES IN EACH EVENT

\* Big Air, Half Pipe, Slopestyle

Each of these events can be conducted with single heat or two heats in qualification (best of two runs), and up to 3 runs during finals.

Each run (or each run in each heat if heats apply) in the competition is scheduled as a separate schedule item. They can also be conducted in "double-up" format where athletes in qualification are in two heats running alternately or two genders running alternately.

Note that Slopestyle default judging format is Section-by-Section, but it can be conducted as overall judging (no sections).

Alternative Formats will be available in the DT\_CONFIG.

The messages containing results information are separated into two message, one DT\_RESULT for qualification and one DT\_RESULT for the finals. These messages contain all the competitors participating in the phase, with their results, regardless of the number of runs or heats or formats. The runs and heats are scheduled separately.

#### \* Snowboard Cross

The initial phase will be qualification or seeding depending on the number of competitors. There are up two runs. There is a single DT\_RESULT for qualification. [this phase does not exist in team event].

The finals consist of multiple heats with leaders progressing to the next phase. There is one DT\_RESULT per heat in addition to a DT\_BRACKET message.

#### SCHEDULE

The DT\_SCHEDULE/DT\_SCHEDULE\_UPDATE will include every heat & run/jump in qualification and finals as well as at phase level (matching the DT\_RESULT messages above).

## 2.2 Applicable Messages

The following table is a full list of all ODF messages and describes the list of messages used in this discipline.

- The column "Message type" indicates the DocumentType that identifies a message
- The column "Message name" is the message name identified by the message type
- The column "Message extended" indicates whether a particular message has extended definition in regards to those that are general for all sports. If one particular message is not extended, then it follows the general definition rules.
- Message responsibilities appears in the ODF General Document.

| Message Type                                  | Message Name   | Message\n<br>extended |

## 2.3 Messages

## 2.3.1 List of participants by discipline / List of participants by discipline update

#### 2.3.1.1 Description

A participant is considered to be any individual (type athlete, participating or not in the current games) or any official in one or several disciplines or a competitor being part of a team (team member).

Although the participant may participate in more than one event or more than one discipline, this message just contains the information for the discipline of the message, listing the information of all the events for that discipline.

This message includes historical athletes that do not participate in the current competition. Historical athletes will not be registered to any event.

It is important to note that all the sport messages that make references to athletes (start list, event unit results, etc.) will always match the athlete ID with the athlete ID in this message. The historical athletes will be used to match historical athlete information as it appears in the records message when sending the previous record information and this previous record was an historical record not being broken in the current competition.

List of participants by discipline (DT\_PARTIC) is a bulk message, provided for each discipline. It is a complete participant information message for one particular discipline. The arrival of this message resets all the previous participants' information for one particular discipline. This message can include a list of current athletes, officials, coaches, guides, technical officials, Reserves and historical athletes regardless of status.

List of participants by discipline update (DT\_PARTIC\_UPDATE) is an update message. It is not a complete list of participants' information by discipline message, only the participant data being modified, i.e. if some data of one participant changes, the element Participant for it with all its children and attributes must be sent.

The key of the information updated consists of the following attribute: Participant @Code. Therefore, any new or updated Participant Discipline-Event will be identified by all these attributes.

#### 2.3.1.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                         | Comment   |
|-----------------|-------------------------------|---|
| CompetitionCode | CC @Competition               | Unique ID for competition   |
| DocumentCode    | CC @Discipline                | Full RSC at the discipline level  |
| DocumentType    | DT_PARTIC<br>DT_PARTIC_UPDATE | / List of participants by discipline message  |
| Version         | 1V                            | Version number associated to the message's content. Ascending number  |
| FeedFlag        | "P"-Production<br>"T"-Test    | Test message or production message.   |
| Date            | Date                          | Date when the message is generated, expressed in the local time zone where the message was produced.                    |
| Time            | Time                          | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced. |

Olympic Data Feed - © IOC Technology and Information Department

| LogicalDate |            | Logical Date of events. This is the same as the physical day except when<br>the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation. |
|-------------|------------|---|
| Source      | SC @Source | Code indicating the system which generated the message.   |

#### 2.3.1.3 Trigger and Frequency

The DT\_PARTIC message is sent as a bulk message prior to the Games. It is sent several times up to the date of transfer of control to OVR after which only DT\_PARTIC\_UPDATE messages are sent.

The DT\_PARTIC\_UPDATE message is triggered when there is a modification in the data for any individual after the transfer of control to OVR.

#### 2.3.1.4 Message Structure

The following table defines the structure of the message.

| Level 1           | Level 2           | Level 3            | Level 4 | Level 5 | Level 6 |
|-------------------|-------------------|--------------------|---------|---------|---------|
| Competition (0,1) |                   |                    |         |         |         |
|                   | Gen               |                    |         |         |         |
|                   | Sport             |                    |         |         |         |
|                   | Codes             |                    |         |         |         |
|                   | Participant (1,N) |                    |         |         |         |
|                   |                   | Code               |         |         |         |
|                   |                   | Parent             |         |         |         |
|                   |                   | Status             |         |         |         |
|                   |                   | GivenName          |         |         |         |
|                   |                   | FamilyName         |         |         |         |
|                   |                   | PassportGivenName  |         |         |         |
|                   |                   | PassportFamilyName |         |         |         |
|                   |                   | PrintName          |         |         |         |
|                   |                   | PrintInitialName   |         |         |         |
|                   |                   | TVName             |         |         |         |
|                   |                   | TVInitialName      |         |         |         |
|                   |                   | TVFamilyName       |         |         |         |
|                   |                   | LocalFamilyName    |         |         |         |
|                   |                   | LocalGivenName     |         |         |         |

## 2.3.1.5 Message Values

| Element: Competition | Element: Competition (0,1) |       |  |  |  |
|----------------------|----------------------------|-------|--|--|--|
| Attribute            | M/O                        | Value | Description  |  |  |
| Gen                  | 0                          | S(20) | Version of the General Data Dictionary applicable to the message |  |  |
| Sport                | 0                          | S(20) | Version of the Sport Data Dictionary applicable to the message   |  |  |
| Codes                | 0                          | S(20) | Version of the Codes applicable to the message                   |  |  |

| Element: Competition /F | Element: Competition /Participant (1,N) |                              |   |  |  |
|-------------------------|---|------------------------------|---|--|--|
| Attribute               | M/O                                     | Value                        | Description   |  |  |
| Code                    | М                                       | S(20) with no leading zeroes | Participant's ID.   |  |  |
|                         |   |                              | It identifies an athlete or an official and the holding participant's valid information for one particular period of time.  |  |  |
|                         |   |                              | It is used to link other messages to the participant's information.   |  |  |
|                         |   |                              | Participant's information (example @Organisation) will not be<br>the latest for the athlete/official, unless the @Code attribute is<br>the same as the @Parent attribute. However, this information<br>could be the one being valid in the particular moment of a start<br>list, event unit results, etc. |  |  |
|                         |   |                              | When the participant is an historical one, then this ID will start<br>with "A" when it is an Athlete, "C" when Coach and "O" when<br>Official.  |  |  |
| Parent                  | М                                       | S(20) with no leading zeroes | Participant's parent ID, which is used to link to the latest valid<br>information for one participant. @Parent attribute should be<br>linked to the latest participant's information, by retrieving that<br>Athlete/Official whose @Code attribute is the same as @Parent.                                |  |  |

Olympic Data Feed - © IOC Technology and Information Department

|                    |   |                  | The participant containing @Code attribute being the same as<br>the @Parent attribute will be the one with the latest information<br>for the participant.<br>The @Parent attribute will only be different from @Code in the<br>case that critical personal information has changed from<br>previous competitions. The typical examples are Organisation<br>(for change of country) or Name (particularly for women<br>changing their name at marriage). Further to be clear, @Parent<br>and @Code can only be different if Current = "false". |
|--------------------|---|------------------|---|
| Status             | 0 | CC @ParticStatus | Participant's accreditation status this attribute is Mandatory in<br>the case of @Current="true" and it is optional in the case that<br>@Current="false".<br>To delete a participant, a specific value of the Status attribute is<br>used.  |
| GivenName          | 0 | S(25)            | Given name in WNPA format (mixed case)  |
| FamilyName         | М | S(25)            | Family name in WNPA format (mixed case)   |
| PassportGivenName  | 0 | S(25)            | Passport Given Name (Uppercase).  |
| PassportFamilyName | 0 | S(25)            | Passport Family Name (Uppercase).   |
| PrintName          | М | S(35)            | Print name (family name in upper case + given name in mixed case)   |
| PrintInitialName   | М | S(18)            | Print Initial name (for the given name it is sent just the initial, without dot)  |
| TVName             | М | S(35)            | TV name   |
| TVInitialName      | М | S(18)            | TV initial name   |

| LocalGivenName     | 0 | S(25)            | Given name in the local language in the appropriate case for the local language (usually mixed case)  |
| Gender             | М | CC @PersonGender | Participant's gender  |
| Organisation       | М | CC @Organisation | Organisation ID   |
| BirthDate          | 0 | YYYY-MM-DD       | Date of birth. This information may not be known at the very beginning, but it will be completed for all participants after successive updates  |
| Height             | 0 | S(3)             | Height in centimetres. It will be included if this information is available. This information is not needed in the case of officials/referees.<br>"-" may be used where the data is not available.  |
| Weight             | 0 | S(3)             | Weight in kilograms. It will be included if this information is available.<br>This information is not needed in the case of officials/referees.<br>Do not send attribute if data not available.   |
| PlaceofBirth       | 0 | S(75)            | Place of Birth  |
| CountryofBirth     | 0 | CC @Country      | Country ID of Birth   |
| PlaceofResidence   | 0 | S(75)            | Place of Residence  |
| CountryofResidence | 0 | CC @Country      | Country ID of Residence   |
| Nationality        | 0 | CC @Country      | Participant's nationality.  |
|                    |   |                  | Although this attribute is optional, in very exceptional situations<br>it will not be known, and for this reason not ready to be sent.  |

| MainFunctionId        | 0 | CC @ResultsFunction | Main function<br>In the Case of Current="true" this attribute is Mandatory.  |
|-----------------------|---|---------------------|--|
| Current               | М | boolean             | It defines if a participant is participating in the games (true) or is a Historical participant (false).   |
| OlympicSolidarity     | 0 | S(1)                | Send Y if the participant is a member of the Solidarity / Scholarship Program else not sent.   |
| ModificationIndicator | М | S(1)                | <ul> <li>'N' or 'U'</li> <li>Attribute is mandatory in the DT_PARTIC_UPDATE message only</li> <li>N-New participant (in the case that this information comes as a</li> </ul> |
|                       |   |                     | late entry)<br>U-Update participant  |
|                       |   |                     | If ModificationIndicator='N', then include new participant to the previous bulk-loaded list of participants  |
|                       |   |                     | If ModificationIndicator='U', then update the participant to the previous bulk-loaded list of participants   |
|                       |   |                     | To delete a participant, a specific value of the Status attribute is used.   |

#### Element: Competition /Participant /Discipline (1,1)

All participating athletes will be assigned at least one discipline, it could be more. Each accredited official will be assigned at least one discipline, but it could be more. If an athlete or official is assigned to more than one discipline, it will be included in the participant message of both disciplines.

| Attribute | M/O | Value          | Description   |
|-----------|-----|----------------|---|
| Code      | М   | CC @Discipline | Full RSC of the Discipline.<br>It is the discipline code used to fill the OdfBody<br>@DocumentCode attribute. |
| IFId      | 0   | S(16)          | IF ID (competitor's federation number for the discipline if it is assigned).                                  |

Element: Competition /Participant /Discipline /RegisteredEvent (0,N)

All accredited athletes will be assigned to one or more events. There is one exception: in some sports, substitutes may be accredited without any associated event. Historical athletes are not registered to any event.

| Attribute | M/O | Value     | Description           |
|-----------|-----|-----------|-----------------------|
| Event     | М   | CC @Event | Full RSC of the Event |

## 2.3.1.6 Message Sort

The message is sorted by Participant @Code

## 2.3.2 List of teams / List of teams update

#### 2.3.2.1 Description

DT\_PARTIC\_TEAMS contains the list of teams related to the current competition.

A team is a type of competitor, being a group of two or more individual athletes participating together in one event. One team participates in one event of one discipline. When one team participates in multiple events, there will be one team for each event for the same group. Also when the same organisation participates in the same event twice, there will different teams.

List of teams (DT\_PARTIC\_TEAMS) is a bulk message by discipline. The list is always complete. The arrival of this message resets all the previous participant teams' information for that discipline. It is assumed that all teams appearing in this list are valid, in the meaning that they are participating, or they could participate in one event.

A historical team is defined as a group of athletes (team members) competing in the past in a competition event for an organisation. The historical team members appearing in this message will be listed in the list of historical athletes' messages. The list of historical teams just associates historical team members with the corresponding historical teams. Historical teams will not be registered to any event.

List of teams update (DT\_PARTIC\_TEAMS\_UPDATE) is an update message. It is not a complete list of teams' information message. It only contains the data of a team being modified.

#### 2.3.2.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                                       | Comment   |
|-----------------|---|---|
| CompetitionCode | CC @Competition                             | Unique ID for competition   |
| DocumentCode    | CC @Discipline                              | Full RSC at the discipline level  |
| DocumentType    | DT_PARTIC_TEAMS /<br>DT_PARTIC_TEAMS_UPDATE | List of participant teams message   |
| Version         | 1V  | Version number associated to the message's content. Ascending number  |
| FeedFlag        | "P"-Production<br>"T"-Test                  | Test message or production message.   |
| Date            | Date  | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time            | Time  | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate     | Date  | Logical Date of events. This is the same as the physical day except when<br>the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation. |

#### 2.3.2.3 Trigger and Frequency

The DT\_PARTIC\_TEAMS message is sent as a bulk message before the Games. It is sent several times up to the date of transfer of control to OVR after which only DT\_PARTIC\_TEAMS\_UPDATE messages are sent.

The DT\_PARTIC\_TEAMS\_UPDATE message is triggered when there is a modification in the data for any team

Olympic Data Feed - © IOC Technology and Information Department

after the transfer of control to OVR.

#### 2.3.2.4 Message Structure

#### The following table defines the structure of the message.

| Level 1           | Level 2    | Level 3               | Level 4           | Level 5 | Level 6 |
|-------------------|------------|-----------------------|-------------------|---------|---------|
| Competition (0,1) |            |                       |                   |         |         |
|                   | Gen        |                       |                   |         |         |
|                   | Sport      |                       |                   |         |         |
|                   | Codes      |                       |                   |         |         |
|                   | Team (1,N) |                       |                   |         |         |
|                   |            | Code                  |                   |         |         |
|                   |            | Organisation          |                   |         |         |
|                   |            | Number                |                   |         |         |
|                   |            | Name                  |                   |         |         |
|                   |            | ShortName             |                   |         |         |
|                   |            | TVTeamName            |                   |         |         |

## 2.3.2.6 Message Sort

The message is sorted by Team @Code.

WYOG-2024-SBD-3.3 SFA

## 2.3.3 Event Unit Start List and Results

#### 2.3.3.1 Description

The Event Unit Start List and Results is a message containing both the start list and results information of the competitors.

This is always a full message and all applicable elements and attributes are always sent.

#### 2.3.3.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                      | Comment   |
|-----------------|----------------------------|---|
| CompetitionCode | CC @Competition            | Unique ID for competition   |
| DocumentCode    | CC @Phase<br>CC @Unit      | Full RSC at phase or unit level as appropriate.<br>The DocumentCode will be sent according to the header values.  |
| DocumentSubcode | N/A                        | N/A   |
| DocumentType    | DT_RESULT                  | Event Unit Start List and Results message   |
| DocumentSubtype | N/A                        | N/A   |
| Version         | 1V                         | Version number associated to the message's content. Ascending number  |
| ResultStatus    | CC @ResultStatus           | It indicates whether the result is official or unofficial (or intermediate etc).<br>Expected statuses are:<br>START_LIST<br>LIVE (used during the competition when nothing else applies).<br>INTERMEDIATE (used after the competition has started and is not<br>finished but not currently live)<br>UNCONFIRMED (used after the competition is completed and before<br>either UNOFFICIAL or OFFICIAL. It may be sent multiple times if<br>modifications are required and the status has not changed)<br>UNOFFICIAL<br>OFFICIAL<br>PROTESTED |
| FeedFlag        | "P"-Production<br>"T"-Test | Test message or production message.   |
| Date            | Date                       | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time            | Time                       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate     | Date                       | Logical Date of events. This is the same as the physical day except when<br>the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation.   |
| Source          | SC @Source                 | Code indicating the system which generated the message.   |

## 2.3.3.3 Trigger and Frequency

This message is sent:

\* As soon as the start list is available and any for changes [inc. IRMs] (START\_LIST)

\* Send with all updates during the unit (LIVE)

\* In Slopestyle: Send after each athlete completes one section and judges have entered the scores (LIVE)

\* Send after each athlete (with all intermediate data and judge data) completes the course (and has all data) (LIVE)

\* In messages with multiple heats or runs then send after each heat/run (INTERMEDIATE)

Olympic Data Feed - © IOC

Technology and Information Department

- \* After the competition related to the message is finished. In detail
  - UNCONFIRMED: In cases of photofinish (Cross Events)
  - UNOFFICIAL: As soon as a competition is finished
  - OFFICIAL: After results are validated.
- \* Send as PROTESTED if applicable

\* After any change (status as appropriate)

#### 2.3.3.4 Message Structure

The following table defines the structure of the message.

| Level 1         | Level 2         | Level 3          | Level 4         | Level 5        | Level 6       | Level 7    | Level 8 |
|-----------------|-----------------|------------------|-----------------|----------------|---------------|------------|---------|
| Competition (0, | 1)              |                  |                 |                |               |            |         |
|                 | Gen             |                  |                 |                |               |            |         |
|                 | Sport           |                  |                 |                |               |            |         |
|                 | Codes           |                  |                 |                |               |            |         |

## Officials>

#### Element: Competition /Result (1,N) In Cross, BA, HP and SS this element only contains the phase result information. Attribute M/O Value Description Rank 0 String Rank of the competitor. In the case of BA, HP and SS qualifications there may also be athletes with the same rank in the case that qualifications are conducted in heats. In the case of the finals in cross the rank in the message is the final overall rank. 0 Send 'Y' if the rank is equalled else do not send. (They are not RankEqual S(1) considered equal for the special cases above). Result 0 m:ss.ff Result for the particular event unit. Send in the case @ResultType is TIME or POINTS or ##0.00 Cross Group-Heats: send heat points when available or 0 IRM 0 SC @IRM IRM for the event unit Send only in the case @ResultType is IRM QualificationMark 0 SC @QualificationMark Qualifying Mark. Only send if applicable SortOrder М Numeric This attribute is a sequential number with the order of the results #0 for the event unit, if they were to be presented. It is mostly based on the rank, but it should be used to sort out rank ties as well as results without rank. Prior to the unit the order is the same as StartSortOrder. (even if some have IRM) Updated during the race with the current order, which is those with rank followed by those with IRM followed by those who have not started. In the case of units with heats the heat 2 will follow heat 1. In the case of Snowseed this should be updated with the correct order.

Document Control

| StartOrder     | 0 | S(3)           | The start order of the unit.<br>For Cross Finals this field is the Lane Choice<br>In the case of multiple heats numbers will be repeated.<br>In the case of multiple runs (but not multiple heats) this will be<br>the start order of the first run.  |
|----------------|---|----------------|---|
| StartSortOrder | М | Numeric<br>#0  | Used to sort all start list competitors in an event unit.<br>Same as SortOrder before the start of the competition.<br>In the case of Snowseed this should be updated with the correct<br>order.  |
| ResultType     | 0 | SC @ResultType | Result type as appropriate.   |
| Diff           | 0 | +m:ss.ff       | Time behind leader in the unit (only for those with a result). 0.00<br>for the leader. Do not send leading zeros. Only send in the case<br>@ResultType is TIME<br>SBX(SBD):<br>- In seeding: time difference compared to the leader.<br>- In Finals: time difference compared to the Heat leader. |

### 2.3.3.6 Message Sort

Sort by Result @SortOrder

## 2.3.4 Current Information

#### 2.3.4.1 Description

The Current message is a message containing the current information for a competition which is live. The message is used to send the latest applicable information.

This message should only be used to build a standalone current table and not used to merge data with the DT\_RESULT message. If the message is merged there is be conflicts where multiple people can have the same intermediate rank and the full DT\_RESULT is only updated after each athlete.

This message is expected in HP, SS, BA Qualification

#### 2.3.4.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                      | Comment   |
|-----------------|----------------------------|---|
| CompetitionCode | CC @Competition            | Unique ID for competition   |
| DocumentCode    | CC @Phase<br>CC @Unit      | Full RSC at phase or unit level as appropriate.<br>The DocumentCode will be sent according to the header values.  |
| DocumentSubcode | N/A                        | N/A   |
| DocumentType    | DT_CURRENT                 | Current message   |
| DocumentSubtype | N/A                        | N/A   |
| Version         | 1V                         | Version number associated to the message's content. Ascending number  |
| FeedFlag        | "P"-Production<br>"T"-Test | Test message or production message.   |
| Date            | Date                       | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time            | Time                       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate     | Date                       | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight. See full explanation in ODF Foundation. |
| Source          | SC @Source                 | Code indicating the system which generated the message.   |

#### 2.3.4.3 Trigger and Frequency

This message is sent in Individual Events

\* Before the competition or run starts with the value of NEXT

\* At any time a competitor starts. (This athlete/pair will be considered current) and there will be a new 'next' (unless last athlete). Not applicable in ski cross finals.

\* Immediately after every addition/change in data during the run.

\* Immediately after each competitor completes the course and the data is available.

Each message will only include the athletes currently on the course and the one/pair to follow 'Next'; this is usually not more than four athletes.

#### 2.3.4.4 Message Structure

The following table defines the structure of the message.

## 2.3.4.6 Message Sort

Sort by Result @SortOrder.

## 2.3.5 Phase Results

#### 2.3.5.1 Description

The Phase Results is a message containing the results for the competitors in a particular phase.

The phase message is used to compare competitors from different units within a phase where the competitors usually participate once in the phase.

In the Youth Olympic Winter Games it is used in the Qualification (Group Heats) phase of SBX.

#### 2.3.5.2 Header Values

The following table describes the message header attributes.

| Attribute              | Value                      | Comment   |
|------------------------|----------------------------|---|
| CompetitionCode        | CC @Competition            | Unique ID for competition   |
| DocumentCode           | CC @Phase                  | Full RSC of the phase   |
| DocumentSubcode        | N/A                        | N/A   |
| <b>DocumentType</b>    | DT_PHASE_RESULT            | Phase Results message   |
| <b>DocumentSubtype</b> | N/A                        | N/A   |
| Version                | 1V                         | Version number associated to the message's content. Ascending number  |
| ResultStatus           | CC @ResultStatus           | It indicates the status of the results<br>START_LIST<br>INTERMEDIATE (after race unit except the last)<br>UNOFFICIAL (if applicable after the last)<br>OFFICIAL<br>PROTESTED    |
| FeedFlag               | "P"-Production<br>"T"-Test | Test message or production message.   |
| Date                   | Date                       | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time                   | Time                       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate            | Date                       | Logical Date of events. This is the same as the physical day except when<br>the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation. |
| Source                 | SC @Source                 | Code indicating the system which generated the message.   |

#### 2.3.5.3 Trigger and Frequency

Send as soon as the starters are available (START\_LIST)
 Send after each race in the phase (INTERMEDIATE).
 Send as OFFICIAL when all races are complete.
 Trigger also after any change.

#### 2.3.5.4 Message Structure

| The following table defines the structure of the message. |         |         |         |         |         |         |  |

2.3.5.6 Message Sort

Sort by Result @SortOrder.

## 2.3.6 Image

### 2.3.6.1 Description

The Image message is a message containing an image or images file(s) in .jpg or .png format encapsulated in a XML message.

Each message contains only one photofinish picture.

Multiple messages may be sent for the same DocumentCode (a single race [RSC]) when more than one photofinish cases/photos occur in the same race depending on the circumstances of the unit/race.

#### 2.3.6.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                      | Comment   |  |  |
|-----------------|----------------------------|---|--|--|
| CompetitionCode | CC @Competition            | Unique ID for competition   |  |  |
| DocumentCode    | CC @Unit                   | Full RSC of the unit  |  |  |
| DocumentSubcode | Numeric<br>#0              | Picture number<br>This value is a sequential number for each picture provided in a unit<br>(RSC). The value will be 1, 2, 3<br>Where there is only one image related to the DocumentCode then the<br>value 1 is sent. 2, 3 etc. are used if additional images (ranks to be<br>resolved) are sent for the same DocumentCode. |  |  |
| DocumentType    | DT_IMAGE                   | Image message   |  |  |
| DocumentSubtype | S(20)                      | Send PHOTOFINISH  |  |  |
| Version         | 1V                         | Version number associated to the message's content. Ascending number.<br>Values beyond 1 are only used if a message needs to be resent for a<br>second or subsequent image/result with the same DocumentSubcode to<br>replace the original image (to resolve the same rank).  |  |  |
| ResultStatus    | CC @ResultStatus           | Only applicable status is OFFICIAL  |  |  |
| FeedFlag        | "P"-Production<br>"T"-Test | Test message or production message.   |  |  |
| Date            | Date                       | Date when the message is generated, expressed in the local time zone where the message was produced.  |  |  |
| Time            | Time                       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |  |  |
| LogicalDate     | Date                       | Logical Date of events. This is the same as the physical day except when<br>the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation.   |  |  |
| Source          | SC @Source                 | Code indicating the system which generated the message.   |  |  |

### 2.3.6.3 Trigger and Frequency

Trigger when image available and after any change.

#### 2.3.6.4 Message Structure

The following table defines the structure of the message.

| The following   | table defines                         |         | of the messa | ye.     |         |         |              |

### 2.3.6.6 Message Sort

Sort by Competition /Image /Pos and SortOrder within image.

## 2.3.7 Brackets

#### 2.3.7.1 Description

The brackets message contains the brackets information for one event. It is used in events where there is a necessity to know in advance how successive event units will be filled as the competition progresses. In the early stages of the competition, it indicates how each of the event units will be built from the winners/losers, or other competition rules of the previous event units.

This message is only applicable in SBX and SBT if brackets are used.

#### 2.3.7.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                      | Comment  |
|-----------------|----------------------------|--|
| CompetitionCode | CC @Competition            | Unique ID for competition  |
| DocumentCode    | CC @Event                  | Full RSC of the Event  |
| DocumentType    | DT_BRACKETS                | Brackets message   |
| Version         | 1V                         | Version number associated to the message's content. Ascending number   |
| ResultStatus    | CC @ResultStatus           | Status of the message. Expected statuses are:<br>START_LIST (before any unit is complete)<br>INTERMEDIATE (during the competition)<br>UNCONFIRMED (when last match unconfirmed)<br>UNOFFICIAL (when last match unofficial)<br>OFFICIAL (when all matches official) |
| FeedFlag        | "P"-Production<br>"T"-Test | Test message or production message.  |
| Date            | Date                       | Date when the message is generated, expressed in the local time zone where the message was produced.   |
| Time            | Time                       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.  |
| LogicalDate     | Date                       | Logical Date of events. This is the same as the physical day except when<br>the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation.  |
| Source          | SC @Source                 | Code indicating the system which generated the message.  |

### 2.3.7.3 Trigger and Frequency

This message should be sent at the very beginning of a competition, as soon as brackets are available.

Send when a match/event unit is completed. The message should be updated including information on each competitor in the different bracket items. Only trigger once after each unit unless there are changes in the contents.

The @ResultStatus attribute will vary depending on the competition status.

\* Send with ResultStatus = "START\_LIST" when bracket available and no units are complete

\* Send with ResultStatus = "INTERMEDIATE" until the last event unit (Gold Medal unit) is Unofficial (i.e. for all event units up until the Gold Medal match is completed for an event)

\* Send with ResultStatus = "UNOFFICIAL" when the last event unit for an event (Gold Medal match) has Unofficial status.

\* Send with ResultStatus = "OFFICIAL" when the last event unit for an event (Gold Medal match) has Official

### 2.3.7.6 Message Sort

The following order applies:

\* Bracket: by @Code FNL and CFNL.

\* BracketItems: It will be referred to BracketItems /BracketItem /Unit (all BracketItem should be grouped by the BracketItem /Unit attribute).

\* Then, the BracketItem /Unit are sorted according to their scheduled start time.

## 2.3.8 Event Final Ranking

#### 2.3.8.1 Description

The event final ranking is a message containing the final results and ranking at the completion of one particular event, either for individual athletes or for aggregated athletes.

The final ranking message is a generic message for all sports, including the full event final result for all competitors who were either ranked, got an Invalid Rank Mark (disgualified, etc.), or both.

Depending on the sport rules include all competitors in the competition as all can be ranked (as in Marathon) or only include those with a final ranking as other are unranked (as in tennis).

#### 2.3.8.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                      | Comment   |
|-----------------|----------------------------|---|
| CompetitionCode | CC @Competition            | Unique ID for competition   |
| DocumentCode    | CC @Event                  | One message is sent for each event, full RSC.   |
| DocumentType    | DT_RANKING                 | Event Final ranking message   |
| Version         | 1V                         | Version number associated to the message's content. Ascending number  |
| ResultStatus    | CC @ResultStatus           | Result status, indicates whether the data is official or partial.<br>PARTIAL<br>OFFICIAL  |
| FeedFlag        | "P"-Production<br>"T"-Test | Test message or production message.   |
| Date            | Date                       | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time            | Time                       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate     | Date                       | Logical Date of events. This is the same as the physical day except when<br>the unit or message transmission extends after midnight.<br>See full explanation in ODF Foundation. |
| Source          | SC @Source                 | Code indicating the system which generated the message.   |

#### 2.3.8.3 Trigger and Frequency

This message is only triggered after a unit which affects the final ranking is official and that ranking is not subject to change or some ranking in that unit are not subject to change.

The message is expected at the end of each unit during finals along with each change.

\* After a non-final unit which affects the final ranking is official and that ranking is not subject to change. (PARTIAL)

\* After last unit of the competition is official. (OFFICIAL)

#### 2.3.8.4 Message Structure

The following table defines the structure of the message.

| Level 1           | Level 2      | Level 3 | Level 4 | Level 5 | Level 6 | Level 7         |

### 2.3.8.5 Message Values

| Element: Competition (0,1) |     |       |  |  |  |
|----------------------------|-----|-------|--|--|--|
| Attribute                  | M/O | Value | Description  |  |  |
| Gen                        | 0   | S(20) | Version of the General Data Dictionary applicable to the message |  |  |
| Sport                      | 0   | S(20) | Version of the Sport Data Dictionary applicable to the message   |  |  |
| Codes                      | 0   | S(20) | Version of the Codes applicable to the message                   |  |  |

| Element: Competition /ExtendedInfos /SportDescription (0,1) |     |                 |   |  |  |
|---|-----|-----------------|---|--|--|
| Sport Description in text                                   |     |                 |   |  |  |
| Attribute   | M/O | Value           | Description   |  |  |
| DisciplineName  | М   | S(40)           | Discipline ENG Description (not code) from Common Codes |  |  |
| EventName   | М   | S(40)           | Event ENG Description (not code) from Common Codes      |  |  |
| Gender  | М   | CC @SportGender | Gender code for the event unit.                         |  |  |

| Element: Competition /Result (1,N)<br>For any event final ranking message, there should be at least one competitor being awarded a result for the event. |   |                |  |  |  |
|--|---|----------------|--|--|--|
|  |   |                |  |  |  |
| Rank   | 0 | S(3)           | Final rank of the competitor in the event. This attribute is optional because the competitor could be unranked in the case of a red card, for example.   |  |  |
| RankEqual  | 0 | S(1)           | Send Y if the rank is equalled, else do not send   |  |  |
| ResultType   | 0 | SC @ResultType | Send CODE unless IRM applies   |  |  |
| IRM  | 0 | SC @IRM        | Send if the competitor has an IRM  |  |  |
| SortOrder  | М | Numeric        | This attribute is a sequential number with the order of the results<br>for the event, if they were to be presented. It is mostly based on<br>the rank, but it should be used to sort out rank ties as well as<br>results without rank. |  |  |

| Element: Competition /Result /Competitor (1,1) |     |  |  |  |  |  |
|--|-----|--|--|--|--|--|
| Attribute                                      | M/O | Value  | Description  |  |  |  |
| Code   | М   | S(20) with no leading zeroes<br>or SC @CompetitorPlace | Competitor's ID.<br>"NO_AWARD" in the case where there is no competitor in the<br>rank due to IRM. |  |  |  |
| Туре   | М   | S(1)   | A for athlete, T for team  |  |  |  |
| Organisation                                   | М   | CC @Organisation                                       | Competitor's organisation  |  |  |  |

| Element: Competition /Result /Competitor /Description (0,1) |     |       |  |  |  |  |
|---|-----|-------|--|--|--|--|
| Attribute   | M/O | Value | Description                              |  |  |  |
| TeamName  | М   | S(73) | Name of the team. Only applies for teams |  |  |  |
| IFId  | 0   | S(16) | IFId of the team                         |  |  |  |

| Element: Competition /Result /Competitor /Composition /Athlete (0,N) |     |                              |   |  |  |
|--|-----|------------------------------|---|--|--|
| Attribute  | M/O | Value                        | Description   |  |  |
| Code   | М   | S(20) with no leading zeroes | Athlete's ID, corresponding to an individual athlete or a team member.                                      |  |  |
| Order  | М   | Numeric<br>#0                | Order attribute used to sort team members in a team (if Competitor @Type="T") or 1 if Competitor @Type="A". |  |  |
| Bib  | 0   | S(5)                         | Bib number  |  |  |

#### Element: Competition /Result /Competitor /Composition /Athlete /Description (1,1)

| Attribute    | M/O | Value            | Description   |
|--------------|-----|------------------|---|
| GivenName    | 0   | S(25)            | Given name in WNPA format (mixed case)                                  |
| FamilyName   | М   | S(25)            | Family name in WNPA format (mixed case)                                 |
| Gender       | М   | CC @PersonGender | Gender of the athlete   |
| Organisation | М   | CC @Organisation | Athletes' organisation  |
| BirthDate    | 0   | Date             | Birth date (example: YYYY-MM-DD). Must include if the data is available |
| IFId         | 0   | S(16)            | International Federation ID   |

#### Sample (Ranking)

<Result Rank="2" ResultType="CODE" SortOrder="2"> <Competitor Code="2000996" Type="A" Organisation="GER" > <Composition> <Athlete Code="2000996" Order="1"> <Description GivenName="John" FamilyName="Smith" Gender="M" Organisation="GER" BirthDate="1994-12-15" /> </Athlete> </Composition> </Competitor> </Result> <Result Rank="3" ResultType="CODE" SortOrder="3"> <Competitor Code="2030033" Type="A" Organisation="SUI" > <Composition> <Athlete Code="2030033" Order="1"> <Description GivenName="John" FamilyName="Brown" Gender="M" Organisation="SUI" BirthDate="1992-12-15" /> </Athlete> </Composition> </Competitor> </Result>

#### 2.3.8.6 Message Sort

Sort by Result @SortOrder

## 2.3.9 Configuration

#### 2.3.9.1 Description

The Configuration is a message containing general configuration.

#### 2.3.9.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                      | Comment   |  |
|-----------------|----------------------------|---|--|
| CompetitionCode | CC @Competition            | Unique ID for competition   |  |
| DocumentCode    | CC @Phase                  | Send one message per phase with the phase level RSC.  |  |
| DocumentType    | DT_CONFIG                  | Configuration message   |  |
| Version         | 1V                         | Version number associated to the message's content. Ascending number  |  |
| FeedFlag        | "P"-Production<br>"T"-Test | Test message or production message.   |  |
| Date            | Date                       | Date when the message is generated, expressed in the local time zone where the message was produced.  |  |
| Time            | Time                       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |  |
| LogicalDate     | Date                       | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight. See full explanation in ODF Foundation. |  |
| Source          | SC @Source                 | Code indicating the system which generated the message.   |  |

#### 2.3.9.3 Trigger and Frequency

The message is sent prior to any ODF Sports message sending one message for each phase.

Trigger also after any change, but considering that, if possible, the configuration must be provided before the start list.

If a DT\_CONFIG message is sent after a DT\_RESULT in a related unit then the next version of DT\_RESULT must be sent immediately.

#### 2.3.9.4 Message Structure

The following table defines the structure of the message.

| Level 1           | Level 2       | Level 3      | Level 4              | Level 5 |
|-------------------|---------------|--------------|----------------------|---------|
| Competition (0,1) |               |              |                      |         |
|                   | Gen           |              |                      |         |
|                   | Sport         |              |                      |         |
|                   | Codes         |              |                      |         |
|                   | Configs (1,1) |              |                      |         |
|                   |               | Config (1,N) |                      |         |
|                   |               |              | Unit                 |         |
|                   |               |              | ExtendedConfig (1,N) |         |

### 2.3.9.6 Message Sort

There is no general message sorting rule.

## 2.3.10 Weather conditions

#### 2.3.10.1 Description

The Weather Conditions is a message containing the current weather conditions in the venue.

#### 2.3.10.2 Header Values

The following table describes the message header attributes.

| Attribute       | Value                      | Comment   |
|-----------------|----------------------------|---|
| CompetitionCode | CC @Competition            | Unique ID for competition   |
| DocumentCode    | CC @Discipline             | Full RSC at discipline level  |
| DocumentSubcode | CC @Location               | Location code (location level)  |
| DocumentType    | DT_WEATHER                 | Weather conditions in the location as referred to in DocumentSubcode.   |
| Version         | 1V                         | Version number associated to the message's content. Ascending number  |
| FeedFlag        | "P"-Production<br>"T"-Test | Test message or production message.   |
| Date            | Date                       | Date when the message is generated, expressed in the local time zone where the message was produced.  |
| Time            | Time                       | Time up to milliseconds when the message is generated, expressed in the local time zone where the message was produced.   |
| LogicalDate     | Date                       | Logical Date of events. This is the same as the physical day except when the unit or message transmission extends after midnight. See full explanation in ODF Foundation. |
| Source          | SC @Source                 | Code indicating the system which generated the message.   |

### 2.3.10.3 Trigger and Frequency

The message is sent for each session:

\* 30 - 60 minutes before the start of the session and then hourly until the end of the session

#### 2.3.10.4 Message Structure

The following table defines the structure of the message.

| Level 1           | Level 2       | Level 3          | Level 4         | Level 5 |
|-------------------|---------------|------------------|-----------------|---------|
| Competition (0,1) |               |                  |                 |         |
|                   | Gen           |                  |                 |         |
|                   | Sport         |                  |                 |         |
|                   | Codes         |                  |                 |         |
|                   | Weather (1,1) |                  |                 |         |
|                   |               | Date             |                 |         |
|                   |               | Conditions (1,N) |                 |         |
|                   |               |                  | Code            |         |
|                   |               |                  | Humidity        |         |
|                   |               |                  | Wind_Direction  |         |
|                   |               |                  | Condition (0,3) |         |

## 2.3.10.5 Message Values

| Element: Competition (0,1) |     |       |  |  |  |
|----------------------------|-----|-------|--|--|--|
| Attribute                  | M/O | Value | Description  |  |  |
| Gen                        | 0   | S(20) | Version of the General Data Dictionary applicable to the message |  |  |
| Sport                      | 0   | S(20) | Version of the Sport Data Dictionary applicable to the message   |  |  |
| Codes                      | 0   | S(20) | Version of the Codes applicable to the message                   |  |  |

| Element: Competition /Weather (1,1) |     |          |                             |  |
|-------------------------------------|-----|----------|-----------------------------|--|
| Attribute                           | M/O | Value    | Description                 |  |
| Date                                | М   | DateTime | Date/time of the conditions |  |

| Element: Competition /Weather /Conditions (1,N) |     |                   |  |
|---|-----|-------------------|--|
| Attribute                                       | M/O | Value             | Description                                |
| Code  | М   | SC @WeatherPoint  | Weather points, send GEN, START and FINISH |
| Humidity  | 0   | Numeric<br>##0    | Humidity in %                              |
| Wind_Direction                                  | 0   | CC @WindDirection | Wind direction                             |

| Element: Competition /Weather /Conditions /Condition (0,3) |     |  |  |
|--|-----|--|--|
| Send three times in the case of Winter conditions.         |     |  |  |
| Attribute  | M/O | Value  | Description  |
| Code   | М   | S(4)   | Weather condition type, send SKY and SNOW                            |
| Value  | М   | CC @SnowConditions<br>or<br>CC @WeatherCondition | Use CC @WeatherConditions for SKY<br>Use CC @SnowConditions for SNOW |

#### Element: Competition /Weather /Conditions /Temperature (0,N)

Send with different @Code in the case of winter conditions as needed.

| Attribute | M/O | Value                         | Description                                      |
|-----------|-----|-------------------------------|--|
| Code      | М   | S(4)                          | Temperature type, send AIR, SNOW                 |
| Unit      | М   | SC @TemperatureUnit           | Unit for temperature, send both                  |
| Value     | Μ   | Numeric<br>-##0.0 or<br>##0.0 | Temperature of the @Code. Negative is applicable |

| Element: Competition /Weather /Conditions /Wind (0,N) |     |                  |                               |
|---|-----|------------------|-------------------------------|
| Attribute   | M/O | Value            | Description                   |
| Code  | М   | S(5)             | Wind Speed, send SPEED        |
| Unit  | М   | SC @WindUnit     | Unit for Wind. Use MS and KMH |
| Value   | М   | Numeric<br>##0.0 | Wind speed in @Unit degrees.  |

#### Sample (Weather)

<Weather Date="2006-02-06T13:00:00+01:00" >
